

MICROSOFT DEFENDER FOR IoT (OT) DISCOVERY WORKSHOP

Learn how Defender for IoT can help you to secure and monitor your OT estate

Understanding cybersecurity risk with Operational Technology (OT) and Industrial Control Systems can be difficult. ITC Secure's short 2-hour Defender for IoT Workshop helps you understand the features and benefits of the Microsoft Defender for IoT solution for your requirements.

We understand that every businesses environments and requirements will be different due to the complex nature of OT deployments. Additionally, this workshop aims to validate the value and efficacy of running a Defender for IoT Proof of Concept in your OT environment.

For more information please contact us at: enquiries@itcsecure.com or 020 7517 3900

SOLUTION OVERVIEW

Leveraging ITC Secure’s experience in providing security services to critical infrastructure, we help you gain rapid insight into your OT/ICS security posture by working with you to understand your business and your OT deployments.

During the short 2-hour workshop ITC Secure will take you through the Defender for IoT solution, its key features and benefits for you. We will take time to understand you and your business to ensure our recommendations to you are as appropriate as possible and, indeed, the suitability of the solution for your environment.

A technical consultant will part of the workshop, to share knowledge gained from deploying Defender for IoT in the real world.

KEY FEATURES

Collaborative Discovery Workshop

- ITC works with you to understand your business and needs
- Gain tailored insights into how best to deploy and utilise Defender for IoT

Gain insights into the Defender for IoT Solution

- Understand how Defender for IoT can improve the security posture of your OT estate
- Learn how Defender for IoT is deployed, utilised and the requirements needed

Understand Monitoring Defender for IoT

- Learn how Defender for IoT can be connected to Sentinel for enhanced visibility and reporting
- Explore the data and insights provided directly
- Understand if the protocols used in your environment are supported by Defender for IoT

Threat Detection

- Learn how Defender for IoT gives threat visibility and discovery of your OT environment

BENEFITS

- Understand the features and benefits of the Defender for IoT solution
- Work with ITC to understand if Defender for IoT is correct for your business and environment
- Learn how Defender for IoT can improve the visibility of your OT estate
- Understand how Defender for IoT is licenced for your environment
- Access to ITC technical expertise for all questions/considerations regarding how the solution can best work in your environment

WHY ITC

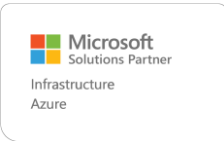

ITC Secure (ITC) is an advisory-led cyber security services provider.

The company has a 25+ year track record of delivering business-critical services to over 300 global blue-chip organisations, bringing together the best minds in security, a relentless focus on customer service, and advanced technological expertise to help businesses succeed.

With its integrated delivery model, proprietary platform, 24x7 fully managed state-of-the-art Security Operations Centre, and customer-first mindset, ITC works as an extension of its customers’ teams to accelerate their cyber maturity – safeguarding their digital ecosystem, securing their business, and their reputation.

ITC serves global organisations from its locations in the UK and US with a world-class team of cyber consultants, technical designers, and cyber experts.

The company is a certified Great Place to Work® employer, active member of the Microsoft Intelligent Security Association (MISA) and winner of the Best Security Company of the Year 2021, Best Workplaces™ 2022, Best Workplaces™ in Tech, and Best Workplaces™ for Wellbeing 2022.
