

SECURITY DONE RIGHT - ESSENTIALS

Secure your Microsoft 365 or Azure environment with cloud-native services and processes.

ARINCO'S SECURITY STRATEGY IS ALIGNED TO THE ASD ESSENTIAL 8 AND PROVIDES YOU WITH A SAFE, STABLE AND SCALABLE SECURITY PLATFORM TO MONITOR AND DEFEND YOUR CLOUD APPLICATIONS AND WORKLOADS.

SECURITY DONE RIGHT ESSENTIALS WITH ARINCO

As organisations move to the cloud, the workload of security teams increasingly expands. Leveraging scalable, reliable and automatic security solutions is vital to ensure your teams can focus on high-value tasks and activities to ensure your organisation remains secure and compliant. Arinco's security strategy is aligned to the ASD Essential 8 and provides you with a safe, stable and scalable security platform to monitor and defend your cloud applications, workloads and endpoints. Utilising leading Microsoft security tools, we provide your teams with the right framework to protect your organisation against cyber threats.

WHY CUSTOMERS USE THE SECURITY DONE RIGHT ESSENTIALS ACCELERATOR

This 8-week engagement is relevant if you:

- Want to leverage a repeatable, established framework for securing Microsoft 365 or Azure
- Are running a Microsoft 365 or Azure environment without strong governance or security controls
- Wish to deploy your security tools as code where possible
- Need assistance developing a tailored strategic security road-map, aligned to the ASD Essential 8

ASSESS YOUR ENVIRONMENT

Current state security assessment and health-check of your Microsoft 365 or Azure environment against the ASD Essential 8.

Development of a tailored strategic security road-map, aligned to the ASD Essential 8 and using a threat-based approach.

Developing a detailed view of your Microsoft 365 or Azure environments ensures that Security teams are equipped to make informed decisions into the future.

DEPLOY YOUR TOOLING

Design and pilot deployment of the Microsoft Security Suite, covering threat detection and controls across:

- Identity
- Endpoints
- Applications
- Infrastructure

Using tools such as Microsoft Intune, Microsoft Sentinel, the Microsoft Defender Suite and Azure AD, teams are enabled for ongoing security operations in the Microsoft Cloud.

AUTOMATE YOUR RESPONSE

Deployment of automated incident response capabilities using Microsoft Sentinel and the Defender Suite, aimed at disrupting the cyber killchain.

Workshops with your team on how to manage and maintain security operations and security risk governance and controls.

The resulting security foundation will provide you with a strong platform to build upon for effective protection, detection and response to cyber threats across your environment.

Arinco achieves the best outcomes by amplifying, partnering and working with your existing teams
