# Stackhero for Directus cloud 🐇

Stackhero for Directus cloud is a hosted and managed solution, configured for high performances and security. Start Directus in just 2 minutes and create your APIs and backoffices now.

Start now ➜

Stackhero is a 🇪🇺**European** company, compliant with GDPR, with servers in 🇪🇺**Europe** and 🇺🇸**USA** depending on your preference!

🪙 Business centric

Start your Directus server in just 2 minutes and be production ready instantly!

Focus on your business, not on your infrastructure anymore.

🚀 Insanely performant

Powered by high performances CPUs, we configure Directus to get a blazing fast solution.

You will be amazed by the performances of your CMS.

Create as many collections, items, users, roles you want and do as many API requests and transfers you need.

As your instance support them, you have no limit!

All inclusive

We add a dedicated email server, a Redis cache and a SQLite database with your Directus service.

You have everything to create your own APIs and backoffices in minutes.

Highly secured

Connections are encrypted by the all new ECDSA and TLS 1.3 technics, increasing security and speed.

You don't have to choose anymore between security or speed, you get both of them.

Updatable in a click

We provide services updates, every time it is necessary.

You just need a click to be up-to-date and get the last release and features of Directus.

✅ Billing per hour

Create and delete Directus as a service when you want, you'll be billed per hour of use and receive a single invoice, each month, with all the details.

✅ Highly scalable

Choose your configuration up to 16 vCPUs and 32 GB of RAM and scale it as your business grows.

✅ Secured backups

Your data are automatically backuped in an atomic way and certified every 24 hours to a secured vault where it can be stored for up to 3 months.
Start your Directus in 2 minutes.
Create your APIs and backoffices now.
