DevSecOps ACCELERATOR

EMPOW WOM ARCHITEC

How do you drive speed without compromising quality and total cost of ownership?

Business Leaders are challenged to adopt modern technology & modern methods to meet market demands.

90% of executives say organizations must **speed** up digital transformation – with cloud at the core – to become agile and resilient. (Accenture)

78% of organizations worldwide say the global pandemic was the catalyst for shifting to a digitalfirst strategy. (IDC)

World-class, dedicated Product Team

Arheitech gives you everything you need to modernize your applications With speed.

> Proven workflow, best practices & processes

Enterprise grade technology & Reference architecture

Building with reference architecture enables you to get to market 54% faster, among several other benefits.

Tried. Tested. True.

Reduce risk that comes from building from the ground up.

Increase velocity

of projects & decrease time to market

Proven quality

with validated technology, architecture and workflows.

There's a very strong correlation between developer productivity

and business impact—it's key to the success of the company.

SEBASTIEN LE CALVEZ >

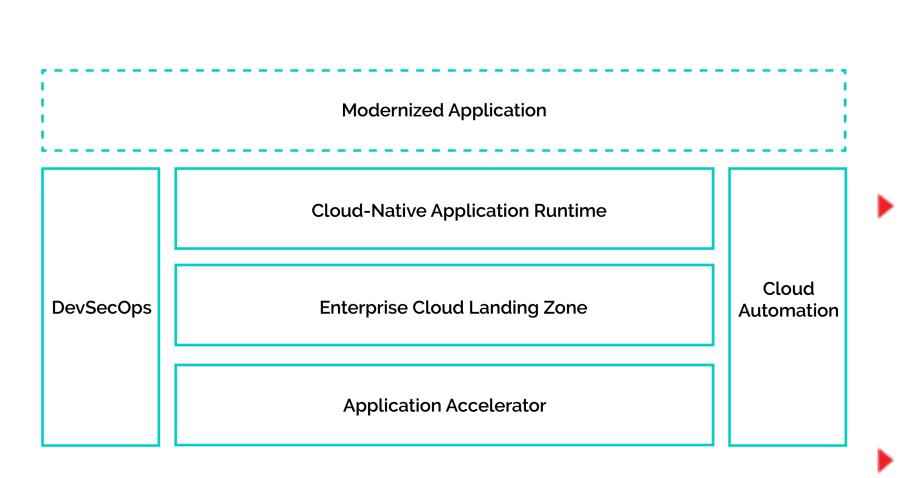

GM, Digital & Application Innovation

Microsoft

How can you drive developer velocity?

Enterprises should embrace repeatable architectures and scaffolds to drive speed in their development practice. The Architech Accelerators are a great example of that.

Pre-defined, Opinioned Reference Architecture

Building Block 1: II

We set the stage for y Pre-settings, workflow landing zone is scalable

Building Block 2: S

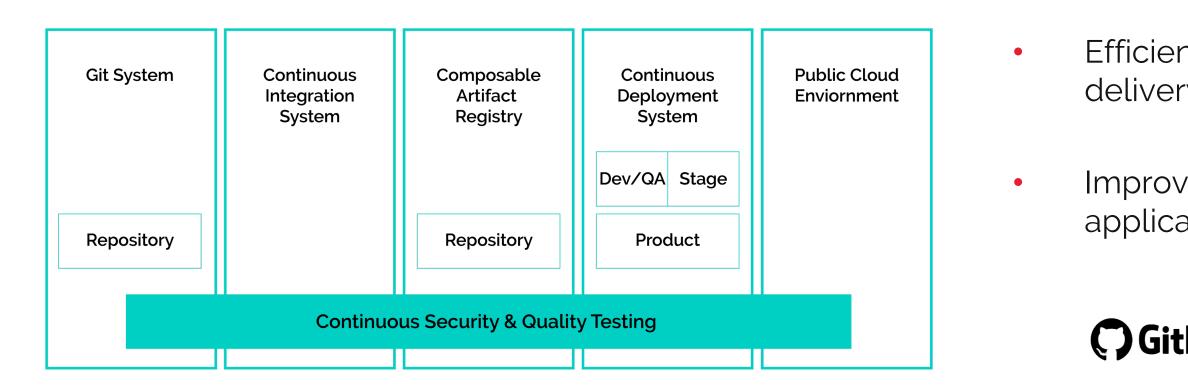

We enable your team consistently and with DevSecOps capabilitie continuous integration pipelines.

Building Block 3: A We ensure your applied deliver consistent qua paths for your data, mi app mesh, Kubernetes

DevSecOps Accelerator

We enable your team to deliver to the market consistently and

We build full end-to-end DevSecOps capabilities, including automated continuous integration/continuous delivery (CI/CD) pipelines. We will build the environments you need - from QA, Dev, Production, etc – per your requirements using our pre-defined frameworks.

Build Innovative Digital Products to Drive Market Impact

I would recommend Architech to any organization that need strong engineering experience ... Architech was a key contributor in helping us build our Ecomm platform.

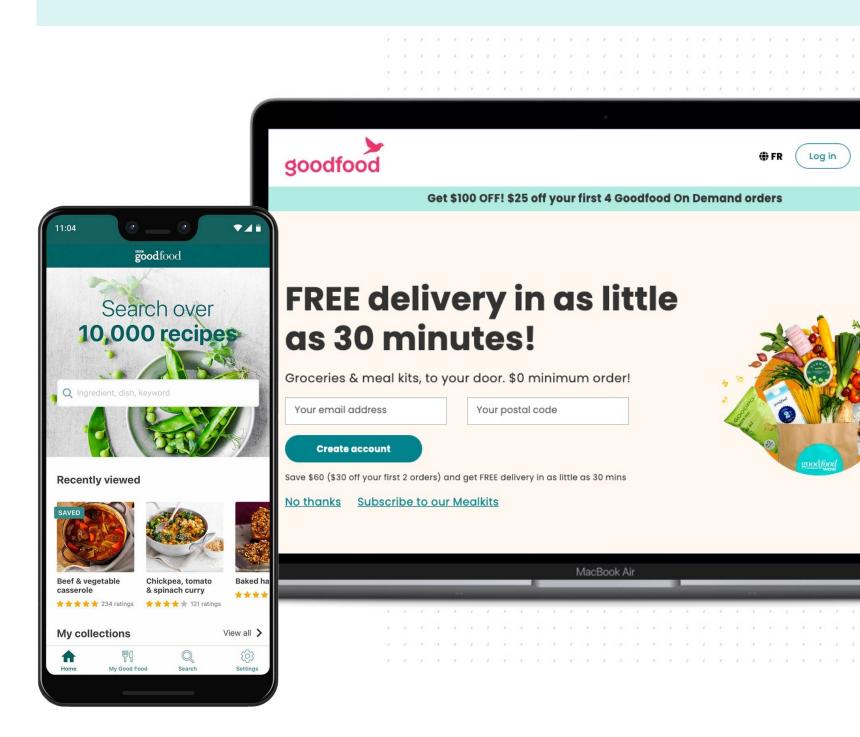

Architech partnered with Goodfood to streamline it's last mile delivery planning process from a manual to an automated process that can scale up to 100+ fulfillment centres.

Through this mobile-first digital solution, Goodfood is able to enable faster deliveries within 60 minutes of ordering and enables customers to pick and choose their delivery slots 48 hours in advance.

"

Increasing delivery speed and flexibility is key to Goodfood's members and growth strategy. Our clients expressed strong interest in a fast and flexible service to simplify their grocery shopping and meal planning, and Goodfood WOW is our answer to that need.

- Jonathan Ferrari, Chief Executive Officer

- VP Engineering, Goodfood

 says of soluboring the mand less them out.

> Knowledge transfer through the entire project and project retros

Raise the averages through thought leadership Embrace proven frameworks and processes Co-creation with Architech leads to long-term benefits for your team

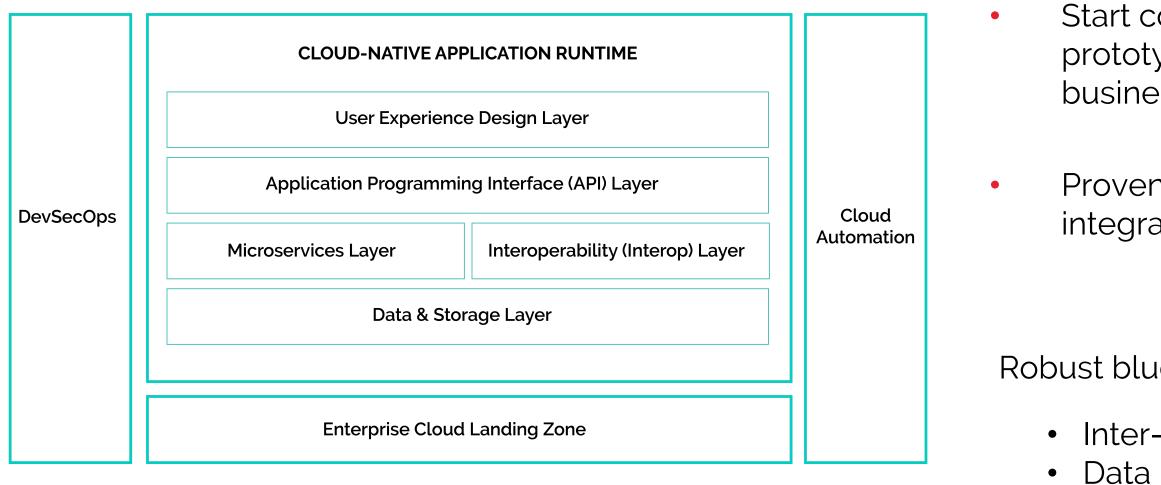

We have an Accelerator for every stage of the Application Modernization Journey:

					<u> </u>
