Who we are

Very different from the others

We are not like the big consulting companies that are more concerned with putting their plan into action at all costs and treat your company as one more client in their portfolio. We want to add to what is essential, respecting your culture, structure, and governance.

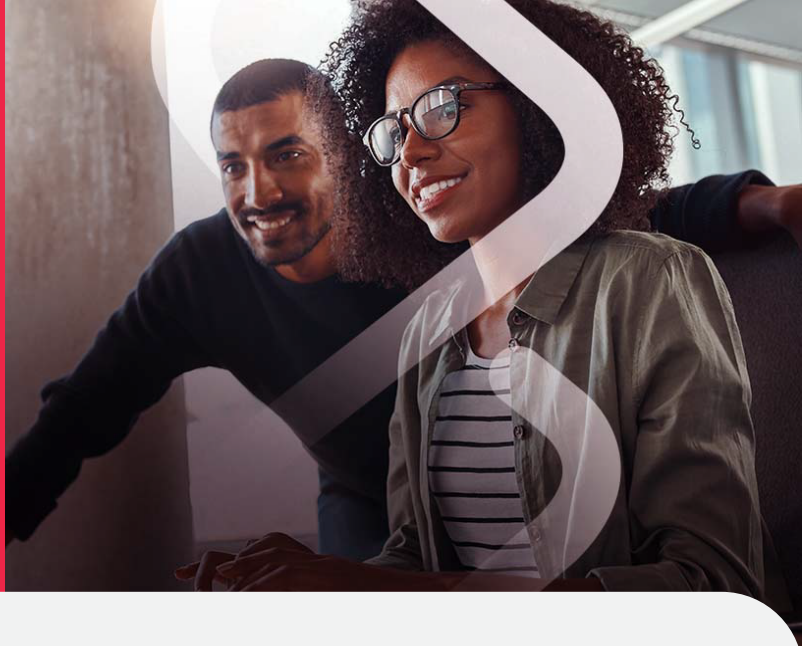

Far beyond a Bodyshop

Here, we go the extra mile. We don't just serve as a recruitment and selection company. We help you build adjusted and resilient squads and follow up with all the allocated professionals closely.

Our Motto: Technology is not enough

In a market of constant chaos, we believe the only possible way to build an IT area with high performance is when we look beyond technology.

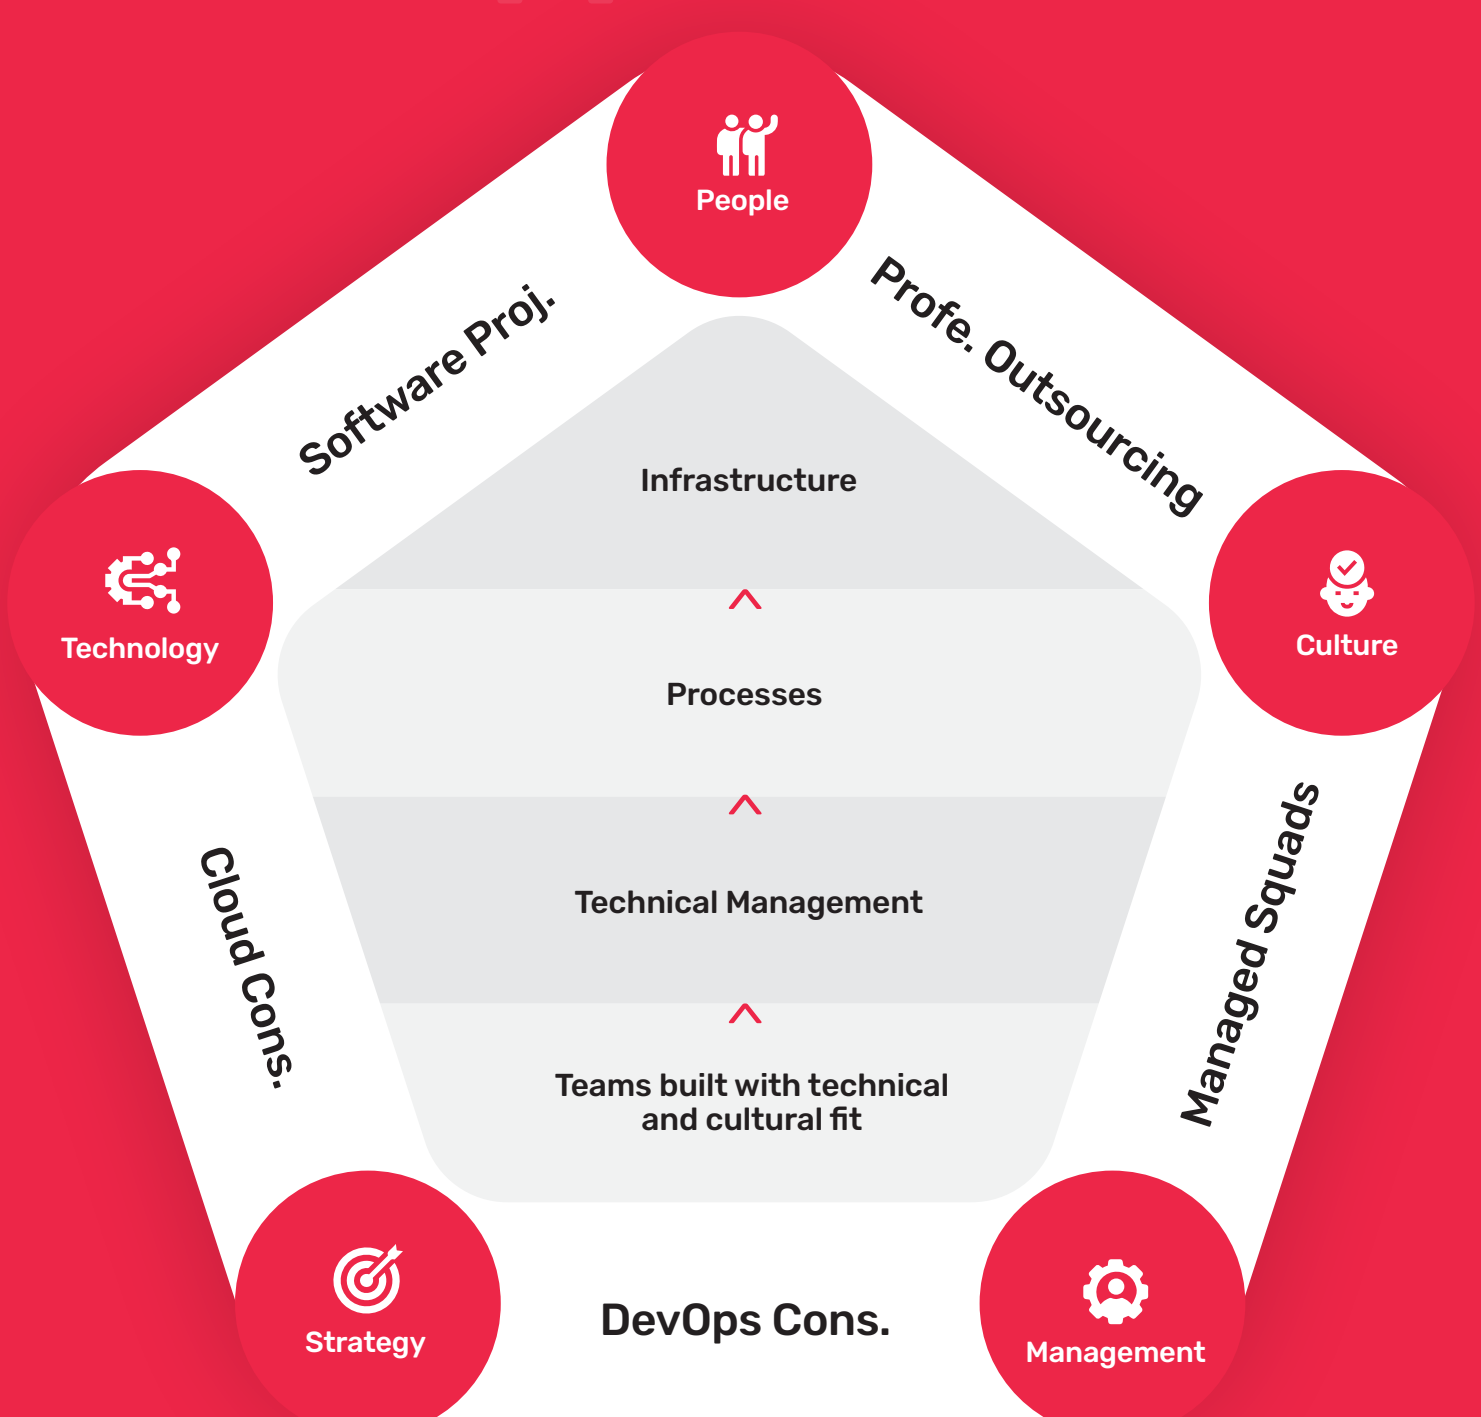

How do we operate?

We act as an extension of your technology team and serve as the right hand of Managers so that they can be less reactive to workloads and manage the 5 fundamental pillars of high-performance IT.

Our Approach

Some of our most successful cases

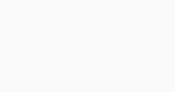

TOTVS

We built the largest installation of the Microsoft Azure DevOps platform (TFS at the time) outside of the United States and facilitated the transition for over 3,000 developers.

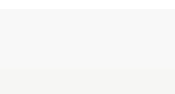

HDI Seguros

With DevOps we migrated all the company's environments to the Google Cloud Platform

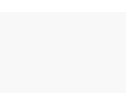

Veloe

We built and are maintaining the entire CI/CD treadmill of the company, with pipelines for Microservices architectures and the consolidation of their repositories in the AWS Cloud.

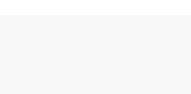

MAG Seguros

We migrated a legacy database that is over 100 years old, as well as maintaining a full DevOps program.

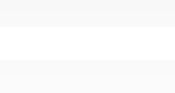

LINX Pagamentos

We migrated a legacy database that is over 100 years old, as well as maintaining a full DevOps program.

Rede Globo

We built a resilient technology team, with more than 50 professionals, for a program of total migration of the media collection of the largest communication group in Brazil and one of the largest in the world.

Localiza

Catalizamos, com DevOps, o programa de migração de todos os

Services Portfolio

Cloud Consulting

Build a Cloud infrastructure from scratch or optimize your existing infrastructure.

We are partners appointed by Microsoft, in Brazil for services in Cloud Computing.

Migration, Optimization, and Support

Gold Application Integration
Gold DevOps
Gold Application Development
Gold Cloud Platform
Silver Data Analytics
Silver Project and Portfolio Management
Silver Datacenter

We are a reference in architecture and optimization of infrastructures based on Cloud Computing, with more than 300 projects carried out and the trust of the largest providers in the world.

Migration

We take your applications, databases, and workloads safely and quickly to the cloud of your choice, whether it's hybrid, public, or private.

Modernization

We make all the necessary technological adaptations so that your system continues to function perfectly in a new environment.

Architecture

We design a flexible and customized architecture to meet the current and future demands of your business without exceeding your needs and wasting your resources.

Support

We offer support to companies that are already fully using the cloud, monitoring hosted applications, or in occasional more complex demands, like the maintenance of possible catastrophic failures, for example.

Financial Optimization (FinOps)

Take control of your expenses by reducing up to 70% of cloud costs.

Optimize your cloud environment and scale it based on your needs.

- Understand what you are paying
Keep cloud costs under control
React immediately to resource misuse
Optimize need versus committed spend
Distribute your consumption (Multicloud)

How does the Cloud drive your business?

Scalability

Use what you need and only when you need it, adding or decreasing resources in your environment instantly.

Predictability

Drive innovation using modern, up-to-date infrastructure while reducing hardware and data center maintenance costs

Security

Run within environments with the strictest security protocols without worrying about software updates

Modernize your infrastructure by taking your business to the Cloud of your choice, whether it is hybrid, public or private

If you're already in the cloud, optimize your infrastructure, react to unnecessary spending, and get the best out of your resources
