# Microsoft Azure Cloud readiness Assessment.

Service Overview:

This review and assessment service is well suited to organisations that are trying to gain a better understanding of workloads they could migrate to Azure whilst minimising risk at the same time.

Additionally, this service will also enable customers to understand their organisations overall readiness for adopting the Microsoft Azure Cloud Platform.

As part of this exercise, the teams at Cloud 9ine Consulting will:

- Produce an Azure readiness report showing which on-premises workloads, including any virtualised environments that can be moved into Azure and those which require additional investigation

- Run an assessment tool against the existing Infrastructure to review and analyse the environment

- Present best practice recommendations for cloud adoption, migration approach and next steps

- Understand how to apply recommended best practices

- Provide a high-level overview of commercial costs based on a migration of the assessed environments into Azure

Our Competencies.

Microsoft Silver Partner

- Data Platform
- Data Analytics

Our Certifications

How we deliver Value.

Our Microsoft certified consultants have both the technical and industry knowledge of understanding business constraints and their ambitions whilst ensuring to drive maximum value out of the services deployed in Microsoft Azure.

We offer a number of different comprehensive services from advisory and best practice, through to design and deployment to suit your business needs.

Throughout our Planning, Design and Delivery phases we align ourselves to the Microsoft Cloud Adoption Framework (CAF) and the Well Architected Framework (WAF). Both of these frameworks provide proven guidance and best practices which helps organisations confidently adopt the cloud and achieve business outcomes.
