SMART DATA EXPORT
FOR DATAVERSE

Add-on alternative for Dynamics 365 Data Export Service

Data Export Service (DES)

provided the ability to replicate data from Microsoft Dataverse to Azure SQL Storage, located in a customer's Microsoft Azure subscription.
Since DES ceased operations in November 2022, SMART business has created its own solution.

SMART Data Export for Dataverse

provides initial synchronization of all necessary data, and then continuously synchronizes delta changes at a rate of more than 5,000 records per minute for each table.

SMART DATA EXPORT FOR DATAVERSE:

Replicates any amount of data from Microsoft Dataverse to Azure SQL Database

Works with a high frequency of data updates in the source

Keeps data up-to-date with the lowest possible delay
