

# MXDR for IT

**Difenda MXDR for IT offers the latest in Microsoft's extended detection and response (XDR)—allowing all organizations to benefit from a world-class cybersecurity program that's built for scale, and integration-ready from day one.**

Difenda is a global, certified, and accredited cybersecurity company that operates highly-certified cyber command centers. As one of Microsoft's top global implementation partners for Microsoft Sentinel and other Microsoft Security suite services, we provide 24/7/365 threat monitoring and response services that protect your cloud environment, network endpoints, and mission critical infrastructure.

## WHAT WE OFFER

### Threat Profiling

Gain full visibility into your threat landscape.

A core component of Difenda's service offerings is the Difenda Shield asset database (i.e., configuration management database) which is designed to iteratively collect, categorize, and display customer environment assets.

### Threat Defense

Prevent, detect, contain, and remediate attacks from all threat vectors.

Difenda MXDR for IT leverages Microsoft 365 Security services to deliver industry-leading threat detection and response, vulnerability management support, attack surface reduction advisory, and customized program development.

### Threat Hunting

Proactively hunt for emerging threats by combining Microsoft technology and Difenda's threat-hunting team.

Proactively detect emerging threats not yet handled by security tools. By using Microsoft security technologies our Threat Hunting team is able to effectively execute hunts based on the latest vulnerabilities and threat actor tactics.

### Threat Response

Contain threats faster with 24/7/365 managed threat response services.

Designed to rapidly contain endpoint, user, and email-based threats, our C3 Security Operations team is responsible for providing threat triage and response for phishing threats, endpoint isolation, user accounts, and more.

### Threat Intelligence

Leverage industry insights from our C3 security experts.

Our analysts identify customer-relevant threat intelligence information that drives our security operations practices, including detection development, threat hunting, and incident response activities.

### Data, Dashboards and Reporting

Designed to leverage customer-owned Microsoft services.

Maintain complete ownership over critical security information. Our customers have full visibility into MXDR for IT service activities, with advanced reports and dashboards designed to support data-driven security decision-making.

**See the difference a personalized approach to cybersecurity makes.**
