IAM FOR SUCCESS:
7-DAY ASSESSMENT

ITC Secure, in partnership with Condatis, are offering an end-to-end identity assessment focusing on how your organisation secures and manages traditional internal and external identities, as well as how Verifiable Credentials can enhance and streamline identity and security.

ITC Secure will run a series of workshops using a combined approach and provide you with a scoring system derived from Microsoft best practices to identify your current state.

The assessment is combined with a prioritised set of actionable recommendations and the benefits to your organisation, highlighting the Azure products and features already paid for that you can leverage further.

SOLUTION OVERVIEW

Held over 5-7 days, ITC and Condatis will run a series of workshops and interviews with the key stakeholders within your organisation – providing us the chance to learn about you and creating an opportunity for you to explore Identity with some of the leading industry experts. Taking the details and environment of your business into account, this is blended with an objective scoring system derived from Microsoft best practices and covering Identity as a whole, rather than the more regular "internal and external silos".

These workshops combine to prepare a report, providing a rich understanding of identity and identity management across your organisation, highlighting potential gaps or opportunities for quick wins, with a prioritised set of actions and their benefits to your organisation for easy digestion and communication.

KEY FEATURES

Situational Analysis
- Workshops with key stakeholders
- Structured interview process ensuring coverage of entire identity landscape
- Maturity model linked back to Microsoft best practice

Focus on Visibility and Benefit
- Clear and objective measure of identity maturity
- Understand identity posture in detail
- Metrics for tracking of identity maturity over time

Actionable Recommendations
- Prioritised actions for your organisation with clear benefit rather than "ivory tower" or "tick box" offers.
- Recommendations aligned to organisational needs and Microsoft best practice
- Links to show objective improvement against your maturity score

BENEFITS

- Gain clear understanding of your current identity posture
- Opportunity to explore Identity with leading industry experts
- Identity maturity assessment based on Microsoft best practice
- Focus attention on areas that will benefit most
- Support business cases with objective data
- Prioritised action plan for next steps

WHY ITC

ITC Secure (ITC) is an advisory-led cyber security services provider.

The company has a 25+ year track record of delivering business-critical services to over 300 global blue-chip organisations, bringing together the best minds in security, a relentless focus on customer service, and advanced technological expertise to help businesses succeed.

ITC serves global organisations from its locations in the UK and US with a world-class team of cyber consultants, technical designers, and cyber experts.

WHY CONDATIS

Condatis is a UK leader for bespoke external identity solutions that streamline IT infrastructures to drive growth, reduce friction and improve security.

Condatis is one of only four global partners chosen by Microsoft to assist customer with Azure AD Verifiable Credentials implementation.

We support our customers technical team to guide them through strategy, design, deployment, and technology support.
