Experience seamles data integration

With the help of Artificial intelligence, Azure Sentinel identifies genuine threats to take action immediately.

Satisfy both IT and Management teams

The combination of centralized control plane and versatile tools enables security teams to effectively manage risk.

Satisfy both IT and Management teams

The Azure Sentinel can be automatically scaled to suit your organizational security demands- saving money in this process!

Get Smarter and Faster Threat Protection

Azure Sentinel uses scalable machines with learning algorithms to detect anomalies and present them in a way that analysts can easily analyze.
