

Accelerating Cloud Virtual Desktops Workshop

Slalom is a purpose-led, global business and technology consulting company.

Leveraging Microsoft Azure Virtual Desktop and Nerdio Manager for AVD to create a dynamic workstation experience for users anywhere, on any device.

Beyond just VDI

Free your workforce from dependence on local hardware and harness the power of Azure with Azure Virtual Desktop, industry leading Windows 10 virtual desktops at global scale.

Why

AVD can save IT expense while increasing security and the quality of the user experience.

How

Slalom provides a complete program to rollout AVD with an easy-to-use control plane and custom monitoring.

Case Study

Learn how Slalom partnered with a Fortune 100 media company to deliver a secure workstation experience to thousands of contractors globally.

Simplifying end user computing

Azure Virtual Desktop is available worldwide. Quickly deploy virtual desktops and apps to enable secure remote work.

Embrace the challenges of a remote workforce

COVID-19 has made organizations of all sizes rethink their strategy for remote work. AVD uses the reach and elasticity of Microsoft Azure to provide resources with on-demand capacity, anywhere in the world.

Secure workstations keep you in control

AVD workstations provide a level of management and control unavailable with physical workstations, protecting against data exfiltration, unauthorized access, and asset loss.

Provide a workstation experience on any device

With support for Windows, Mac, Android, iPhone, iPad, thin clients (including Raspberry Pi), and even HTML5 browsers, AVD uncouples the local device from the always connected, multi-user, Windows 10 workstations.

Bringing technologies together

Nerdio Manager for Enterprise

Nerdio provides an industry leading control plane with support for autoscaling, automation and simple management.

Microsoft Azure

Microsoft Azure can provision new hosts or scale up or down existing ones in minutes on-demand, driving down cost.

Windows 10 multi-session

AVD offers the exclusive Windows 10 multi-session SKU which allows an unlimited number of users to use a single machine at the same time.

Monitoring and Analysis

Our solution includes custom dashboards to offer single pane of glass visibility into the AVD environment.

Synthetic Health Checks

Minute by minute synthetic health checks of the entire logon process grant instant notification of any possible issues.

Image as Code

By using Azure Image Builder and modern DevOps processes, image creation, validation, and reuse can be done quickly with no manual steps.
