

Augment Microsoft 365 eDiscovery workflows with the global scale and flexibility of Epiq's service and technology solutions

Epiq provides an integrated portfolio of outsourcing solutions that enhance the reach and scale of eDiscovery processes managed within Microsoft 365

Epiq's comprehensive approach to managing complex eDiscovery requirements includes:

Forensics Collection and Analysis: Cloud, server, laptop/desktop, mobile devices, and more

Coordinated cross-border eDiscovery: In country project management and operational support

Support for emerging enterprise communication platforms: Microsoft Teams, Slack, WeChat, and more

Large scale attorney review services: Local availability in United States, Canada, United Kingdom, Japan, China, Germany and India

Using Microsoft 365 as the foundation, streamline your eDiscovery processes

A shift to using Microsoft 365 eDiscovery solutions provides an opportunity to redesign and optimize your approach for internal investigations, litigation, public record requests and regulatory business processes. Epiq can help you address large data volumes, compressed timelines and complex requirements if the need arises.

Epiq solution

Epiq provides a complete set of eDiscovery service and technology solutions coordinated on a global scale. These solutions can augment your use of Microsoft 365 compliance features with a battle-tested selection of on-demand and managed services options that span the entire EDRM.

Expected process and top three benefits
