

# Enhance business agility by weaving security into your operating DNA

## Make security an intrinsic part of your digital fabric

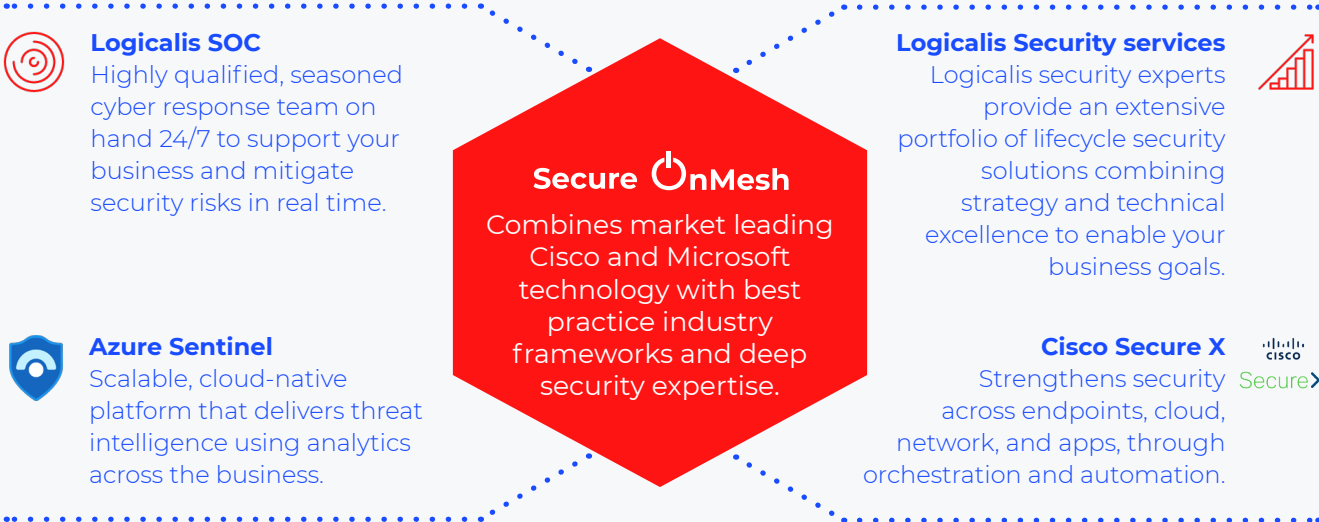

To compete in the modern marketplace, businesses must be able to adapt to opportunities in real-time. This requires a digital operating model that provides unprecedented levels of agility and flexibility while simultaneously meeting the highest standards of customer security and data integrity.

That's why we designed our Secure OnMesh solution. It weaves real-time security telemetry and response into every element of your digital fabric, so you have the confidence to focus on what matters most to your business – driving greater agility, innovation, and growth.

## An integrated solution embedded within your business

Secure OnMesh integrates and orchestrates security across your entire digital ecosystem using a hyperscale cloud-native platform, to provide automated intelligent insights that can be analyzed and actioned in real-time.

# Turn cybersecurity into a business enabler

A holistic solution stitched into all aspects of your operations, provides the confidence to help you digitally transform.

## Secure IoT

Drive innovation through IoT solutions with a secure and trusted network.

## Productive workplace

Support employee productivity through more secure and flexible remote working.

## Data insights

Use insights to make better security decisions and decide on the best course of action.

## Cloud

Embark upon your cloud journey with confidence and deliver agile solutions.

## Gain deeper insights with greater efficiency

See and act on security threats at speed, so you can focus on higher-level, value-adding tasks.

### Greater insights and more control

Gain better insights across the ecosystem.

### Improved service availability

Leverage advanced threat hunting capabilities to predict incidents before they occur.

### Faster incident resolution

Deal with threats faster using automation.

### Employee empowerment

Allow staff to focus on higher-level tasks.

# How we get you there

We help you get things right the first time, so you can realize value in a short timeframe, and then support you along the journey to ensure continuous improvement.

## **Align** **Secure OnMesh Assessment**

Business Service scoping and operational cost estimate for Secure OnMesh deployment to your digital fabric.

## **Transform** **Secure OnMesh Proof of Value**

Guided proof of value focusing on critical business services.

## **Scale** **Managed Secure OnMesh**

Enable continuous improvement with managed and monitoring services.

## **Start benefiting from a holistic solution focused on growth**

To start benefiting from a solution that transforms cybersecurity into a business enabler that supports digital transformation and business growth.
