ITQAN GLOBAL FOR CLOUD AND DIGITAL COMPUTING SYSTEMS DIGITAL OKTA L.L.C.

Azure WVD Deployment with Digital Okta

A guide to getting started with your WVD Assessment

Introducing the Azure Windows Virtual Desktop (WVD)

This kit is designed to arm you with knowledge and resources to supplement your WVD services with Digital Okta capabilities. In this info kit, we will provide an overview of our expertise and tools and would welcome an opportunity to help fill any gaps.

Who is the Digital Okta Azure WVD Methodology?

▶ DO provides WVD Solutions for Security and regulation applications like financial services, healthcare, and government..

▶ DO enables Elastic workforce needs like remote work, mergers and acquisition, short-term employees, contractors, and partner access.

▶ DO has a specialized bench with deep Cloud and Teams Deployment to work hand-in-hand with partners to fill gaps.

Why Sell Digital Okta WVD Services?

Portfolio Expansion

▸ Specific employees like bring your own device (BYOD) and mobile users, call centers, and branch workers.
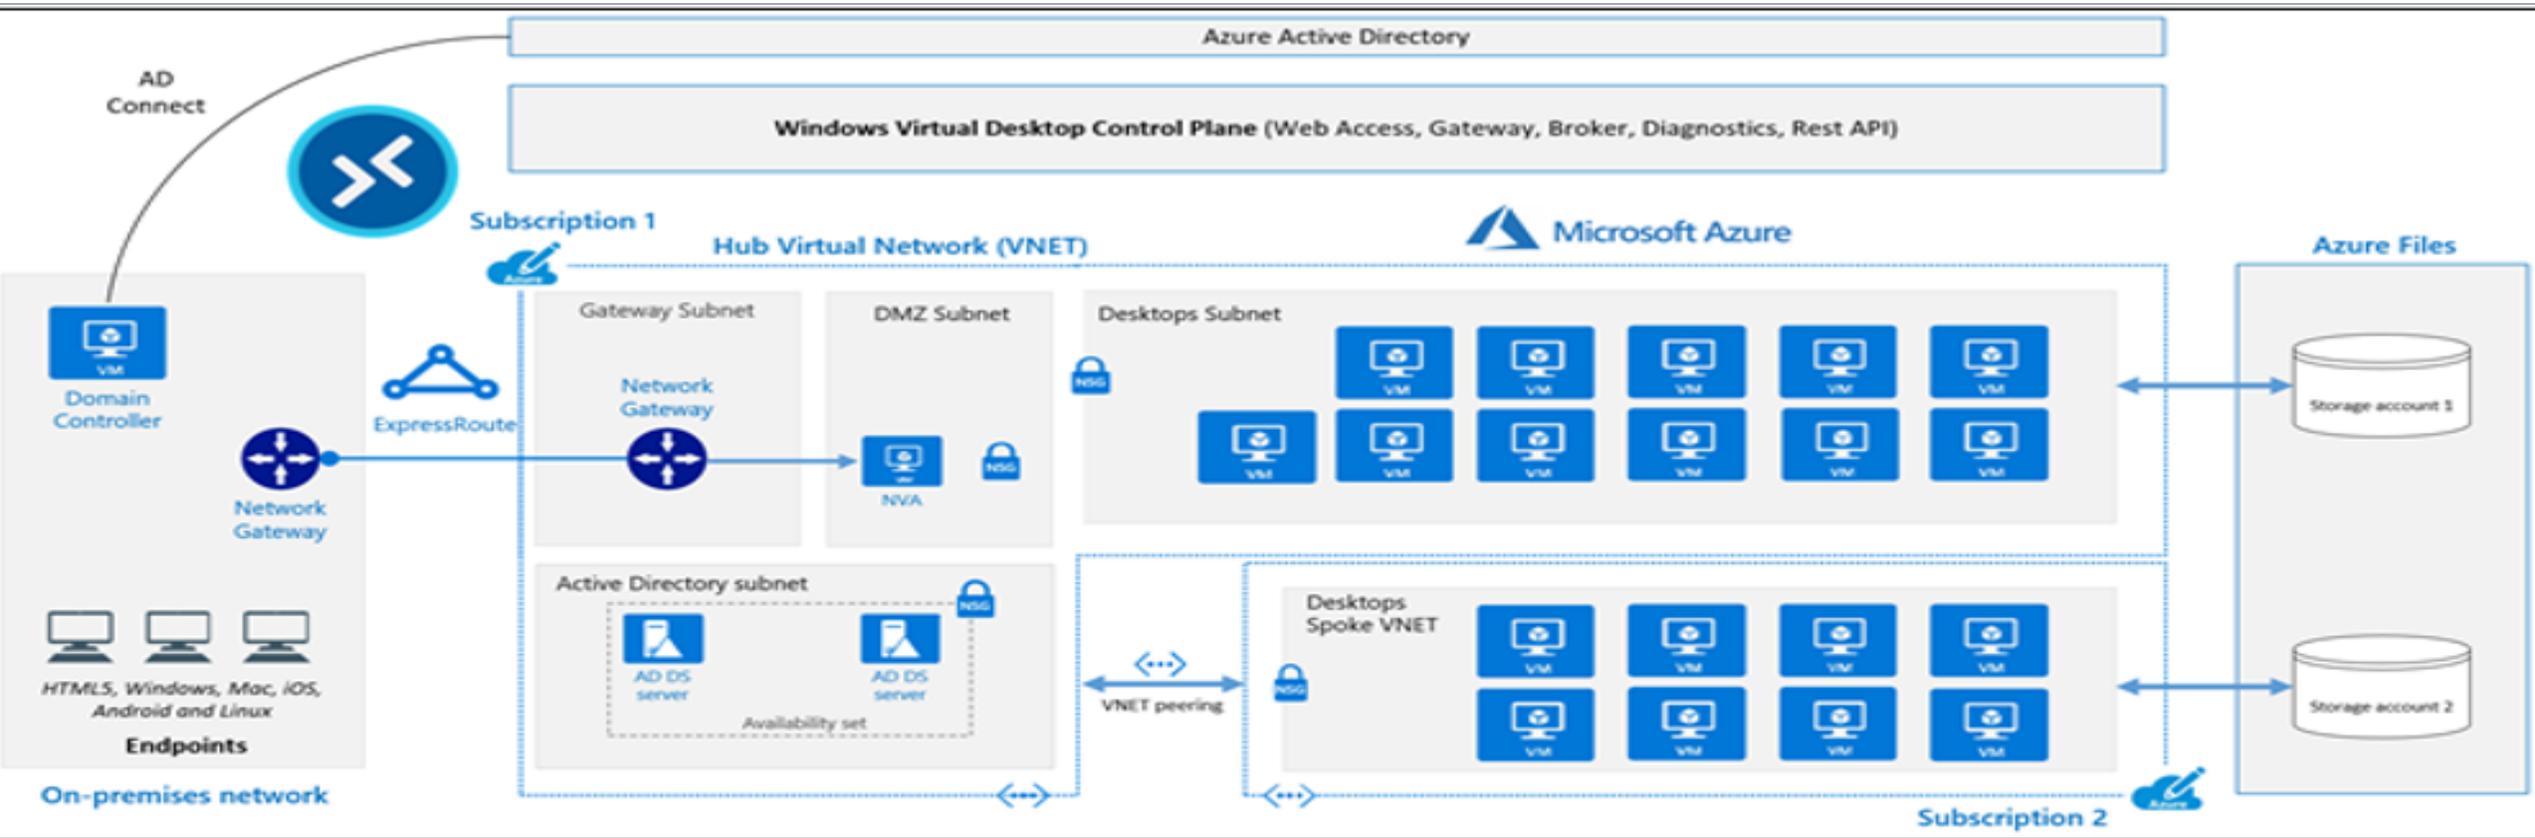

Instant Expertise

▸ WVD supports basic Phone System features, such as call answering and initiating (by name and number) with integrated dial pad, call holding and retrieving, call forwarding and simultaneous ringing, call history, voicemail, and emergency calling.
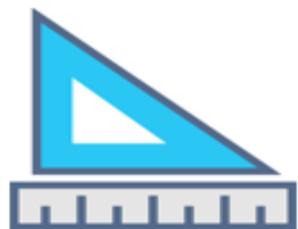

Greater Profitability

▸ Specialized workloads like design and engineering, legacy apps, and software development test.

Enhance "Trusted Advisor" Status

▸ Increase upsell opportunities through having more customer touch points.

Azure Architecture Center – Windows Virtual Desktop at enterprise scale

Windows Virtual Desktop

The best virtual desktop experience, delivered on Azure

- + Deliver the only multi-session Windows 10 experience

- + Enable optimizations for Office 365 ProPlus

- + Migrate Windows Server (RDS) desktops and apps

- + Deploy and scale in minutes

Windows 10 + Office 365

Windows Server

Microsoft Azure

Windows Virtual Desktop

Understanding the virtual environment

As organizations become more complex, users needs change.

They might work...

on specific tasks

from a remote location

a flexible schedule

as independent contractors

OR

from their own devices

Wherever they are...

and whatever device they use...

they have ac cess to the apps they need...

to keep them connected to each other...

and to the information...

to keep them productive.

With diverse devices and a disparate workforce, it's sometimes safer to separate applications from device

Matching, workstyles, devices and platforms can be confusing

Traditional

Hosted

Dedicated

Locally hosted

Not only will a virtualized desktop environment enable users, it can also...

cater for disaster recovery scenarios

support flexible working

provide security and control

facilitate enterprise modality

resulting in

reduced costs

**reduced risks**

business change

flexibility agility

user satisfaction
