Microsoft Purview Data Security Quick Start

## Transform your risk into predictable control frameworks

Is your organization heavily invested in Microsoft cloud platforms, including Exchange Online, SharePoint Online, OneDrive for Business, and Microsoft Teams, for content management and user collaboration? To protect your data and workloads, you need to leverage the control frameworks of the Microsoft Purview data security tool set

> Ensure data isn't being exfiltrated

> Ensure data is protected and you know where it is

Quick Start options and pricing

The Microsoft Purview Data Security Quick Start is a predictable and reliable program that allows you to immediately leverage your Microsoft investments. You'll receive high velocity, measurable outcomes and initial control frameworks for the data inside M365—at a fixed price in a fixed time frame.

PRICING AND DURATION

Save up to 56% through Microsoft-funded incentives
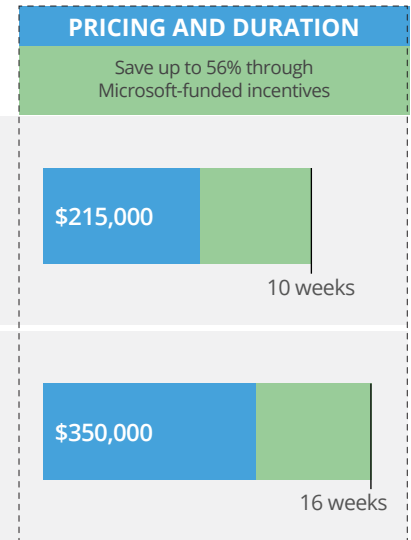

Basic
- Classify sensitive data at rest in the M365 cloud and on-premises content stores
- Identify and prevent loss of data in motion in the M365 cloud and managed endpoints
- Identify and prevent data loss of content in non-Microsoft cloud storage locations
- Produce data risk analytics by content sensitivity and traffic

$215,000 — 10 weeks

Advanced
Includes all initiatives in the basic option plus:
- Detect and govern sensitive information in on-premises infrastructure storage locations
- Target one external cloud-based file storage repository, expanding that same capability into non-Microsoft cloud-based file storage locations with content classification data loss prevention

$350,000 — 16 weeks

Quick Start deliverables

Heat map of current risks

Risks mapped to security frameworks

A secure cloud future state

List of security projects and dependencies

A strategy driving future success

An acheivable roadmap to meet security goals
