# Microsoft Defense & Response in Scale – 1 Hour Briefing

Nordcloud's Microsoft defense & response in scale offering is a tailored briefing encompassing our services available in the Microsoft, hybrid and multi-cloud security.

During our 1 hour briefing one of our security cloud architects will talk you through the different services available in Azure native security solutions and the Microsoft 365 Defender stack. Before the session we will request your requirements to tailor the session just for your needs.

We can cover following, but not limited to:

- Assessment, implementation and configuration of Microsoft Security tools including:

    - Microsoft Defender 365:
        - Microsoft Defender for Endpoint
        - Microsoft Defender Office 365
        - Microsoft Defender for Cloud Apps
        - Microsoft Defender for Identity
    - Microsoft Defender for Cloud + Defender plans
    - Microsoft Sentinel + Logic Apps
    - Azure Arc

After the session, we will recommend next steps how Nordcloud can help you to start adopting these features.

Key words: Hybrid Cloud Security, Multi-Cloud Security

# Microsoft Cloud Defense & Response

Nordcloud consists of Microsoft cloud defense & response professionals, that have extensive knowledge in Microsoft Azure, Microsoft Sentinel and the Microsoft 365 Defender stack. Our skilled people will be able to assist your company in securing both Azure, Multi Cloud and Hybrid environments.
