Optimize shelf inventory replenishment process and avoid stock outs with Affine's Automated Real Time Shelf Inventory Management Solution

With Automated Real Time Shelf Inventory Management Solution, Retail customers can use CCTV camera video feed to track their inventory in real-time, always ensuring accurate and up-to-date records, and enabling store operations staff to manage the inventory levels and avoid stock outs

CHALLENGES

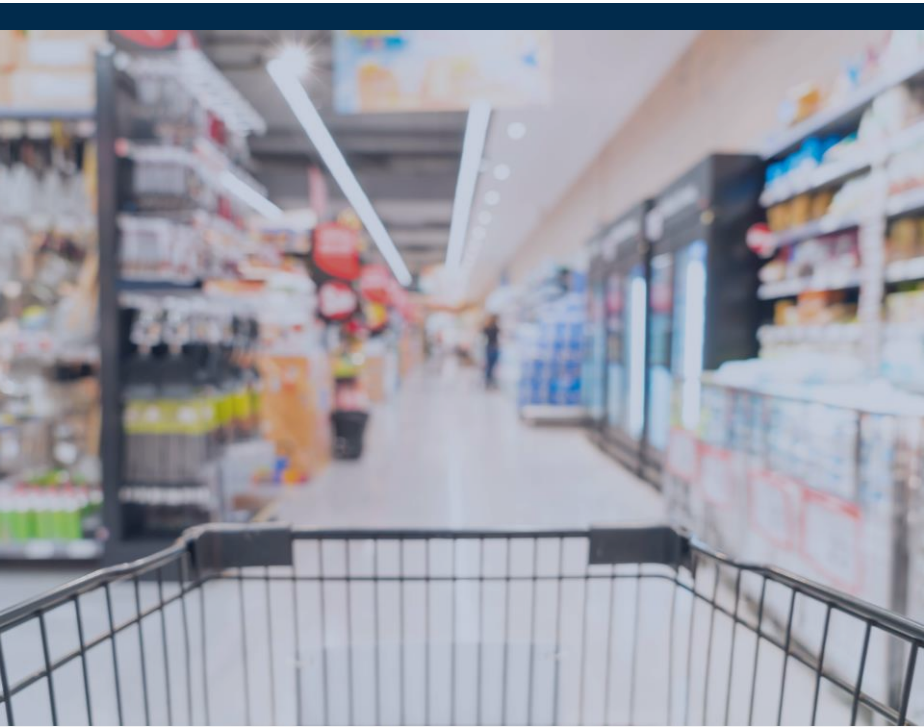

Tracking in-store inventory in real-time, managing the inventory levels and avoiding stock outs

IDEAL SOLUTION

Automated real-time inventory management framework powered by Azure ML and cognitive services which analyze in-store CCTV camera video feeds to monitor shelf inventory

DESIRED OUTCOMES

Solution output integrates with a webtool that allows users to view the CCTV video feeds and see the results of the machine learning analysis in real-time

AFFINE

COMMAND THE NEW
