Microsoft Security Assessment

As organizations navigate a shifting world, their traditional approach to security is failing them. The attacks continue to become even more costly and sophisticated, and with expanding attack surface, both internally and externally, it is becoming even more difficult to keep up. Given this, it's critical to learn how secure your current IT environment is.

Understand how prepared you are when adversaries attack

Get a holistic engagement, covering both technical and business tracks, designed to review the security posture of your Microsoft 365 and Azure environments, and identify areas where Netrix can assist with remediation.

| Strategy & planning workshop | Executive stakeholder interview | Microsoft 365 and Azure security assessment | Secure score analysis | Report creation and readout | Recommendati-ons and next steps |

Microsoft 365 Assessment

Analyze your current Microsoft 365 tenant across identities, devices, data, and applications.

Azure Security Assessment

Analyze your Azure tenant with Microsoft Defender for Cloud, including your Azure Landing Zone readiness.

Final deliverables

Duration: 1 Month   **Cost: $12,500**

Security tooling gaps and prioritized risk recommendations.

Financial summary for proposed security solutions.

Roadmap to implement the security solution, along with a proposal and SOW.

Since 2005, Netrix has been providing engineering expertise, complementary solutions, and supporting services to help clients design, integrate, maintain, and manage their new or existing Microsoft infrastructure
