Microsoft Information Protection & Governance Services

Microsoft Data Protection & Privacy – 1 Hour Briefing

Nordcloud's Microsoft data protection & privacy offering is a tailored briefing encompassing our services available in the Microsoft and hybrid cloud.

During our 1 hour briefing one of our cloud security architects will talk you through the different services available in Azure native Information Protection and Governance stack. Before the session we will request your requirements to tailor the session just for your needs.

We can cover following topics on data classification, protecting your data and preventing data loss, but not limited to:

- Microsoft Information Protection in Microsoft 365
- Azure Information Protection
- Sensitivity labels
- Service encryption
- Microsoft Defender for Cloud Apps
- Azure Purview
- Microsoft Information Protection SDK
- Retention policies for Microsoft 365 workloads
- Records management
- Data loss prevention policies

After the session, we will recommend next steps how Nordcloud can help you to start adopting these features.

Key words: Information Protection, Data Protection, Governance, Privacy

Microsoft Information Protection & Governance Services

Nordcloud consists of Microsoft data protection & privacy professionals, that have extensive knowledge in Microsoft Azure and the Microsoft 365 Defender stack. Our skilled people will be able to assist your company in securing both Azure, Multi Cloud and Hybrid environments.
