

VIVA TOPICS

How it works

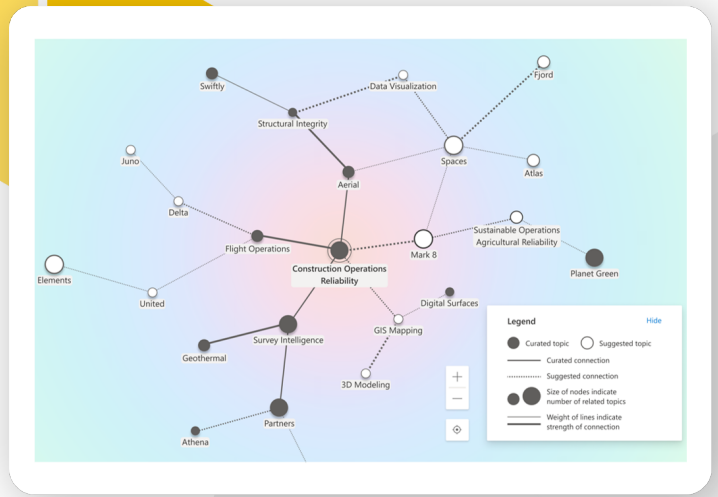

Viva Topics Overview

Viva Topics automatically organises content and expertise across your organisation, making it easy for people to find information and put knowledge to work.

Enable faster learning, connections, and innovation by making information easier to find. Viva Topics uses AI to connect, manage, and help protect your organisation's knowledge and expertise, delivering them across Microsoft 365 apps.

So, why Microsoft Viva Topics?

- 01** Knowing where to search for what, is challenging
- 02** The way people search is often inefficient
- 03** People don't know which search results to trust
- 04** Multiple tools drive context switching

Elevate the **EMPLOYEE EXPERIENCE**

 **Turn content into knowledge**

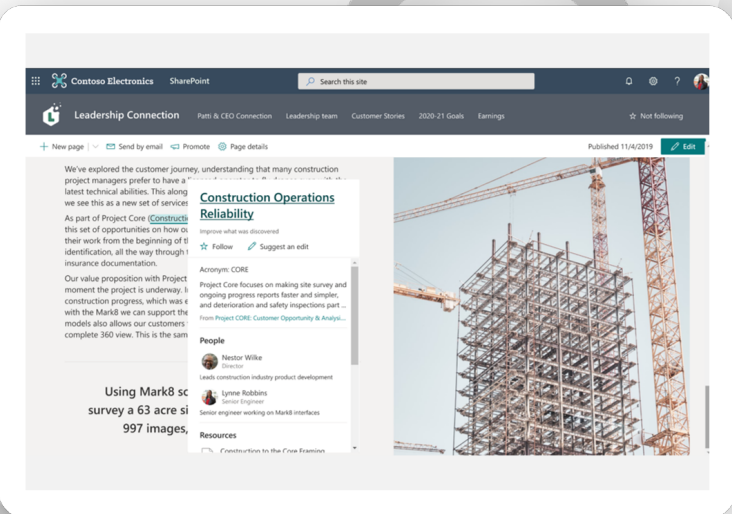

Use AI to reason over your organisation's data and automatically identify, process, and organise content.

 **Organise knowledge**

Create topic pages and topic cards using suggested definitions, related content, relevant conversations, and expertise.

 **Make knowledge easy to discover**

Automatically display topic cards across Microsoft 365 apps to discover knowledge in the context of your work.

Inform **ENGAGE EMPOWER**

- 12x** Highly engaged employees are 12 times less likely to leave their company than those who are not engaged.
- 21%** Organisations with highly engaged employees have 21% greater profitability.
