

AI + Machine Learning

AI & Machine Learning Implementation: 4 Months

Fusion Solution is an award-winning company. We are focusing on cloud innovation and digital transformation. Our certified professional consultant will provide consulting and implementation on AI & Machine Learning based on Microsoft Technology (Azure Machine Learning, Cognitive Services, Azure Bot Service, Azure Cognitive Search)

Many organizations are working on digital transformation, which is essentially a modernization process that aims to integrate digital technology into all areas of business. AI is an important part of digital transformation. Our consultant can help you to deeply understand your data insight in new dimensions.

Scope of work:

- **Assessment:** Examination of the business problem that needs our data scientist to identification and characterization of current organization dataset.
- **Planning:** Identify process evolution goals and defined strategy including well architecture design based on Microsoft Azure AI and Machine Learning.
- **Implementation:** Our consultant will implement a project to solve or explain business problems that a company is facing. This implementation is an end-to-end solution to ensure Azure AI is well implemented for the organization. In this phase, we will be working closely with a customer to implement Azure AI Technology to improve organizational and technological performance, enhance the quality of customer and employee experiences, and accelerate time to market for new offerings and updates.
- **Knowledge Transfer:** Provide training by a certified consultant to make sure all services can be handled and expanded by an internal team.

Deliverables:

- High Level Target State AI Platform Architecture
- Azure AI Platform Blueprints
- Production Ready 1 AI Model based on Business problem (The price is estimated. All working scopes will be proposed later)
