

Digitally enabled front-line workers

Empowering Frontline Workers with the Right Tools

A hybrid setup enables corporate employees to work from anywhere, at any time. However, this is not the case for frontline workers in essential industries. It is necessary for them to be physically present at their job location since they are one of the

most critical human resource groups within the organization.

And at times having to work in difficult conditions as compared to other functions. Therefore, it is imperative that the experience of these frontline workers is preserved and

enhanced at the workplace.

According to Forrester, less than 25% of frontline workers have the proper tools for their jobs. They face a variety of challenges that are directly related to the devices they use.

Key challenges

Disconnected Workforce

A disengaged workforce and difficulty accessing information impact productivity

Inefficient Onboarding

Organizations face challenges onboarding, training, and retaining a distributed workforce

Staying protected & Compliant

Uneven security practices, outdated IT, and information silos increase risk

Manual Processes

Manual processes and outdated digital tools hinder efficiency

Lack of purpose-built devices

Workers use multiple devices and work arounds to complete tasks

Employee well-being

Health and well-being of frontline workers may be jeopardized by erratic work schedules and unfavorable working conditions

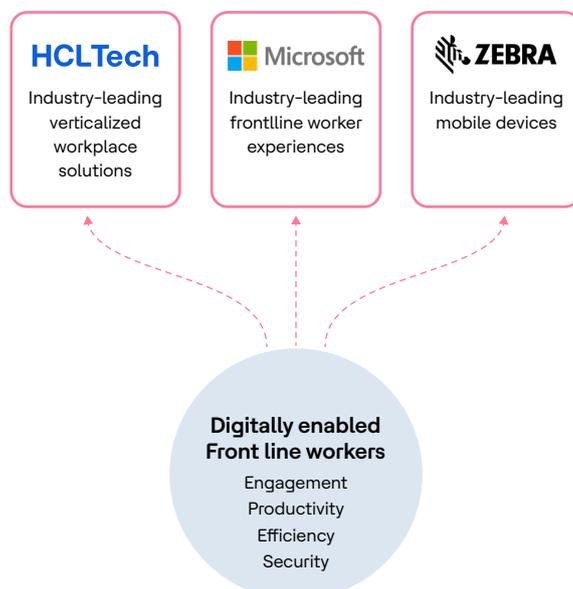

The Power of Three

HCLTech, Microsoft, and Zebra have joined hands together to counter these challenges and enhance the user experience for frontline workers. The joint proposition delivers a comprehensive solution for the entire value chain. Covering aspects like industry-specific mobile devices, consulting, logistics, frontline platforms, and management while building an environmentally sustainable frontline workplace.

HCLTech brings industry-leading verticalized workplace solutions for managing the complete technology ecosystem while enabling technology to drive business.

Microsoft enhances the frontline worker experience with purpose-built solutions that improve engagement, workflow, and security across the organization.

Zebra delivers a performance edge to the front line of business, empowering the frontline workers to make every asset and worker connected and fully optimized.
