

SECURE YOUR AZURE WEB APPS

Reblaze provides automated, robust web security for Microsoft Azure

Reblaze extends and completes Azure's WAF, providing comprehensive protection for sites and web applications. It is an automated, fully managed platform, and is fully integrated with Azure.

Reblaze works seamlessly with Azure Security Center. Traffic data and events from Reblaze are streamed into Security Center, with the ability to quickly drill down and display granular details in real time—even headers and payloads of individual HTTP requests. The platform also integrates with a wide variety of SIEM/SOC solutions, to support your existing workflows. Reblaze deploys in minutes, and runs on your choice of Microsoft Azure and/or other clouds.

TOGETHER, REBLAZE AND AZURE PROVIDE A POWERFUL, TURN-KEY WEB SECURITY SOLUTION.

ABOUT REBLAZE

Reblaze is a cloud-based, fully managed protective shield for sites and web applications. The platform is a comprehensive web security solution, providing a next-gen WAF, DoS and DDoS protection, bot management, scraping prevention, CDN, load balancing, and more.

Reblaze offers a unique combination of benefits. Machine learning provides accurate, adaptive threat detection. Dedicated Virtual Private Clouds ensure maximum privacy. Top-tier infrastructure assures maximum performance. Fine-grained ACLs enable precise traffic regulation. An intuitive management console provides real-time traffic control. Full integration with Microsoft Azure provides a robust, turn-key web security solution.

NEXT-GENERATION WAF/IPS

Reblaze defeats breach attempts, code and SQL injection, cross-site scripting, form manipulation, protocol exploits, session poisoning, malicious payloads, data theft, and other forms of attack.

DOS/DDOS PROTECTION

Reblaze is effective against DoS/DDoS across all layers and all scales: from single malformed-packet DoS attempts to massive DDoS botnet assaults.

BOT MANAGEMENT

Industry-leading bot management prevents data theft & scraping, credential stuffing, dictionary attacks, vulnerability scanners, and more.

REAL TIME TRAFFIC CONTROL

Reblaze provides full real-time traffic analytics and statistics, even during large-scale attacks.

MACHINE INTELLIGENCE

Reblaze continually analyzes global traffic data, using machine learning for accurate, dynamic threat detection. Even as new attack vectors arise, Reblaze adapts and hardens itself against them.

FULLY MANAGED SAAS

The platform is maintained remotely by Reblaze personnel. Your web security is always up-to-date, and always effective.

CDN AND LOAD BALANCING

Global CDN integration and load balancing increase your site's availability and accelerate its responsiveness to your users.

AUTOSCALING

Reblaze scales resources automatically, with no pre-warming required.

Reblaze's clouds are fully compliant with GDPR, SOC 1/ SSAE 16/ ISAE 3402, FISMA Moderate, ISO 27001, FIPS 140-2, HIPAA, and CSA. Reblaze Technologies is a PCI DSS Certified Level 1 Service Provider.
