

Offishall.

# Organise freedom.

Declare where you work, when - in two clics - and visualize where will be your colleagues

6hrs saved for each manager coordinating their teams' presence

Manage hybrid work with data

Natively integrated to your tools

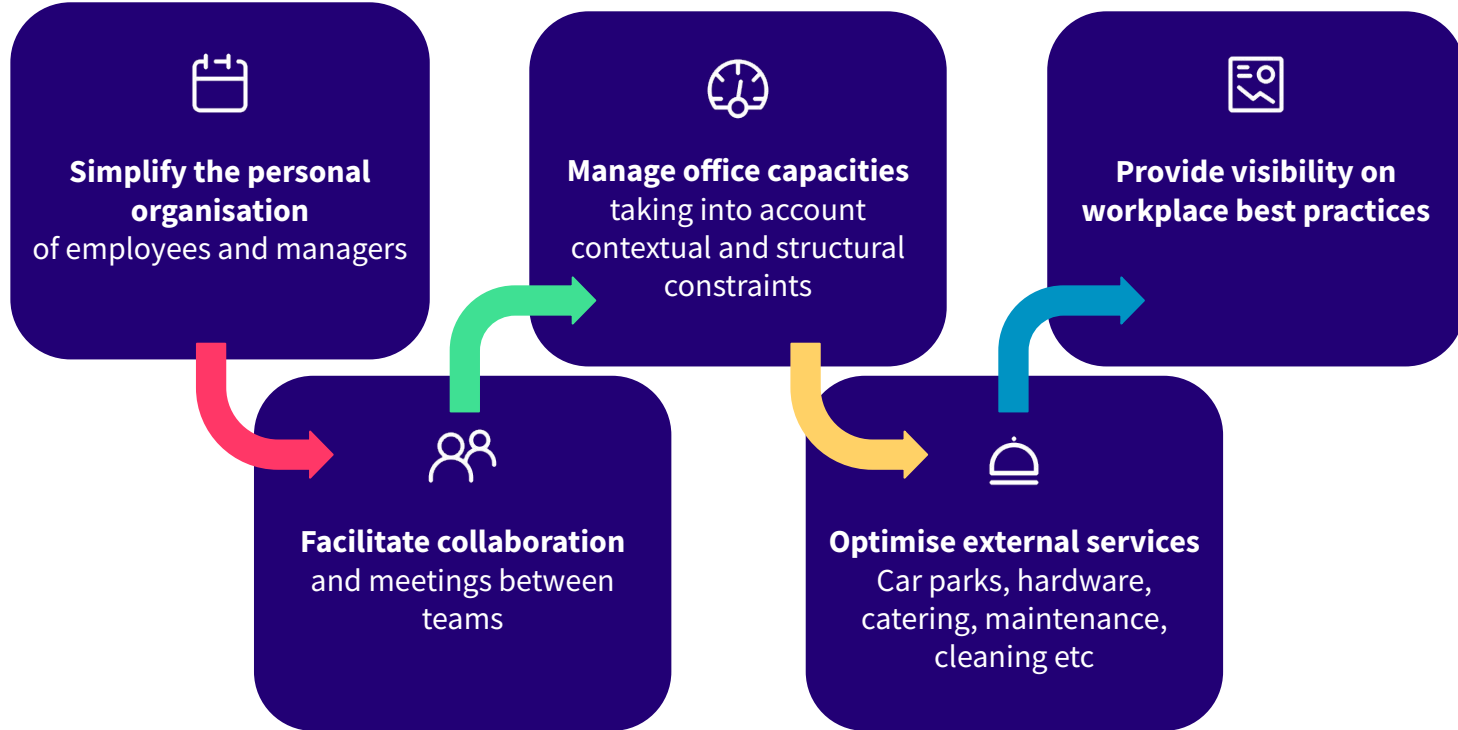

100% secure and compliant on GDPR regulations

5min deployment and super easy administration

## — Hybrid work brings new needs

# Offishall Planning features

**Selection and reservation of the desired workspace**

Access to **workplace preference and consumption** dashboards for all to view

**Visualization of everyone's schedules**

Individual, hierarchical, and functional project/interest groups

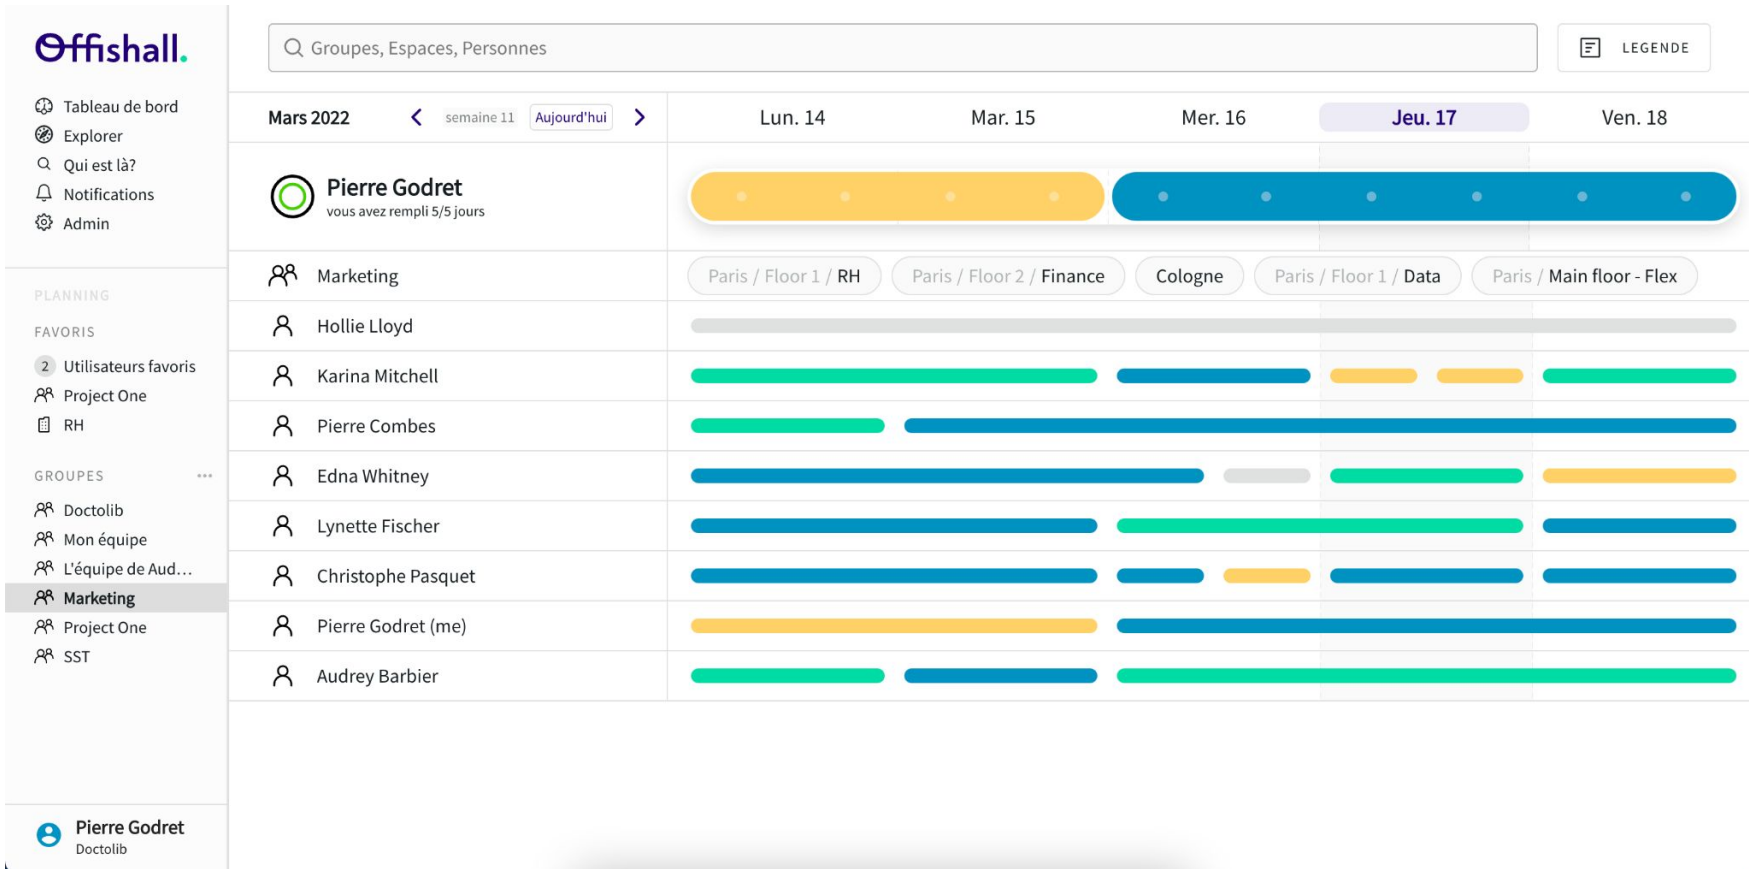

**Services management** to manage canteen, parking, hardware etc...

**Control of office occupancy in real time**

Scalable configuration by offices, sites, teams etc

**Internal events management** to plan efficiently and connect people together

# Who is where, when ?

# Where your users work and live

## Integration scope

### Microsoft Teams

Declare and visualise where people are, when (full feature teams app)

### Outlook Calendar

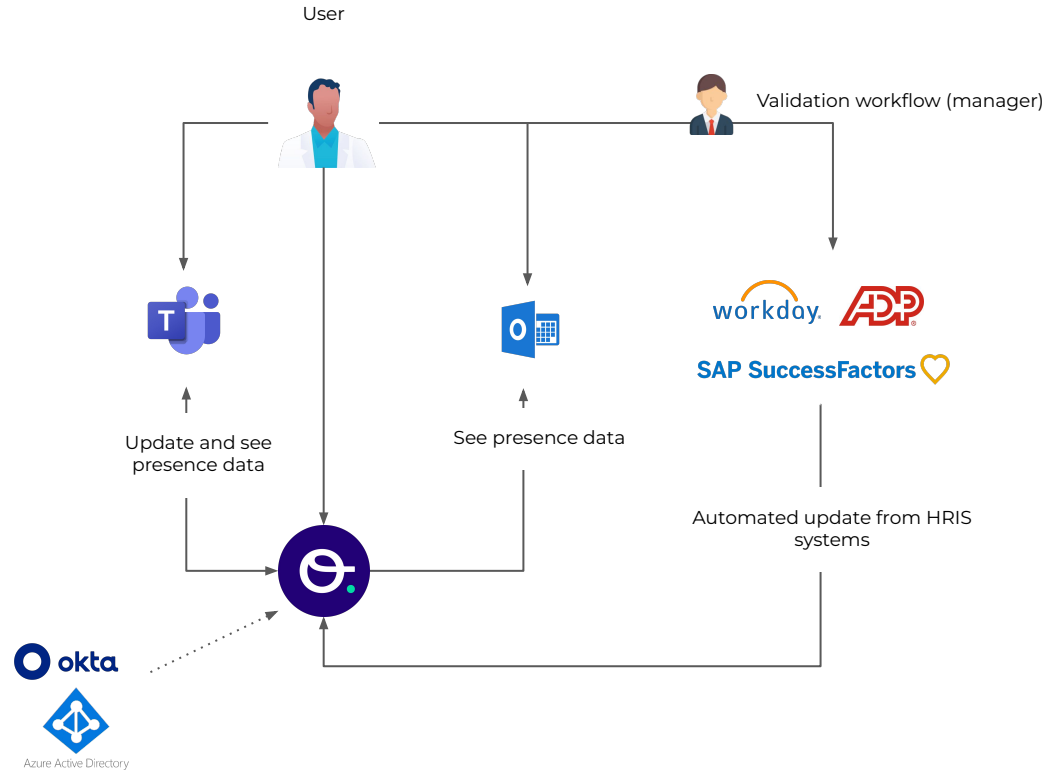

Automatically fill calendars with the presence data

### HRIS

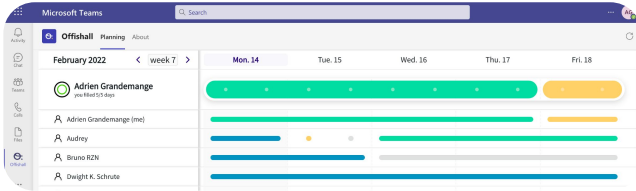

Remote days and/or off days automatically filled in your offishall planning

### SSO & User provisioning

Automated connection and provisioning of users

# At the heart of Microsoft ecosystem

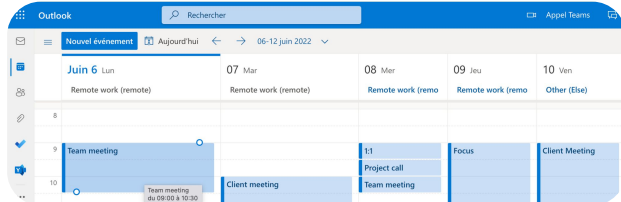

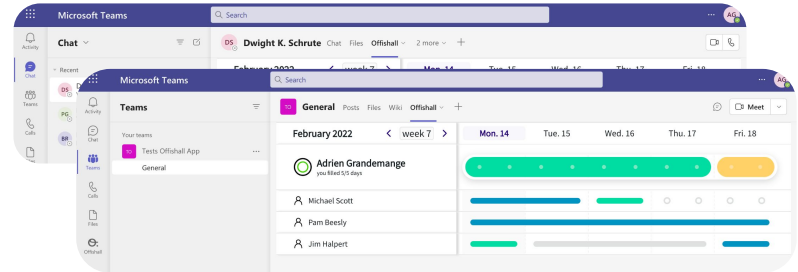

## Find your colleagues

- Declare where you'll be working from
- See where your colleagues will be working from

## Presence data in chats and teams

- Chat > Wonder if the person you're talking to is at the office? Just check the Offishall tab
- Teams > Who's at the office this week in the channel? Just check the Offishall tab
- In both instance, declare and update your own presence

## Outlook calendar sync

- Presence data shows directly in your calendar and is accessible to the people with whom you've shared your calendar

**Our primary focus**  
**92% completion rate**

**Speed**  
One-click booking & visibility

**Fluidity**  
No manager approvals

**Centralisation**  
Ecosystem integration

Azure Active Directory

## — They trust us

Do you ever find yourself not knowing at all who is in the office, who is teleworking and whether the company's gauges are being respected?

To tell you the truth, I do this almost every day, but fortunately I have found the perfect tool. Offishall allows the whole team to gain time and peace of mind by managing their workplace on a shared schedule.

I also have a (big) soft spot for this startup launched by a fabulous entrepreneur Audrey Barbier Litvak and a great team at her side.

*L'Oréal*

Offishall is the most efficient collaborative organisation there is. (...) Goodbye to the Excel file we used to have, where only the managers had to fill it in, modify it, change it again according to the constraints of each person! Now the employee is free to organise his or her own schedule.

### I've trusted Offishall on:

- "From ours (Offishall) experience, the brakes are rather comex or RH but collaborators are satisfied", which is verified
- Comex' involvement thanks to a highly convinced president
- Introducing to the ESC how innovative, easy and crystal clear tool Offishall is
- Employees' workshops to present the different features and to reconnect in person
