

Sentinel 360

Cyber threats in today's digital landscape are constantly evolving and can strike anytime. Don't let your organization be caught off guard - protect yourself with Our Sentinel 360 SOC. Our comprehensive security solution combines advanced threat detection, incident response, and security analytics to keep your data safe and secure. Our security professionals will work with you to customize a plan that fits your organization's needs. Take control of your cybersecurity and choose our Sentinel360 SOC.

Our Process

At Mannai, we are committed to helping your organization stay secure in the face of constantly evolving cyber threats. We offer Microsoft Sentinel 360 SOC as a comprehensive security solution that combines advanced threat detection, incident response, and security analytics. Our security experts will work with you to install and configure components from the Microsoft Cybersecurity Reference Architecture, leveraging AI and Azure Sentinel to provide maximum coverage and effectiveness. By deploying Azure Sentinel in your environment and integrating it with our Qatar-Based Security Centre, we can provide a "single pane of glass" for your Quorum and Internal Security Teams to detect and respond to threats. We aim to reduce the "mean time to detect" and "mean time to resolve" to keep your data safe and secure.

1. Identify & define the scope of Managed Security Services
2. Planning for Azure Sizing and Cost Optimization
3. Enable and onboard into Managed Azure Sentinel quickly and efficiently
4. Collect data across users, devices, applications, and infrastructure, both on-premises and Azure Cloud.
5. Understand the customer's Business Objectives and previous challenges.
6. By leveraging analytics and unparalleled threat intelligence from Microsoft, our solution is designed to detect and respond to previously unknown threats that other security systems may miss.
7. Create advanced threat detection and incident response using Sentinel to investigate threats and hunt suspicious activities at scale, tapping into decades of cybersecurity work.
8. Respond to incidents rapidly with built-in orchestration and automation of everyday tasks.
9. Notify you of any security incidents and provide advice on the next steps for remediation.

What Do we offer?

- 24/7 Monitoring and Protection, Managing
- Advanced threat detection and response
- Customized alerts and notifications
- Easy integration with other security solutions
- Scalable to meet the needs of any business

Sentinel 360 Packages

Price Available Upon Request

Sentinel 360 Standard

1. Around the Clock Monitoring 24*7 to provide Notification alerts and guidance when you need it most.
