Predictive maintenance with IIoT
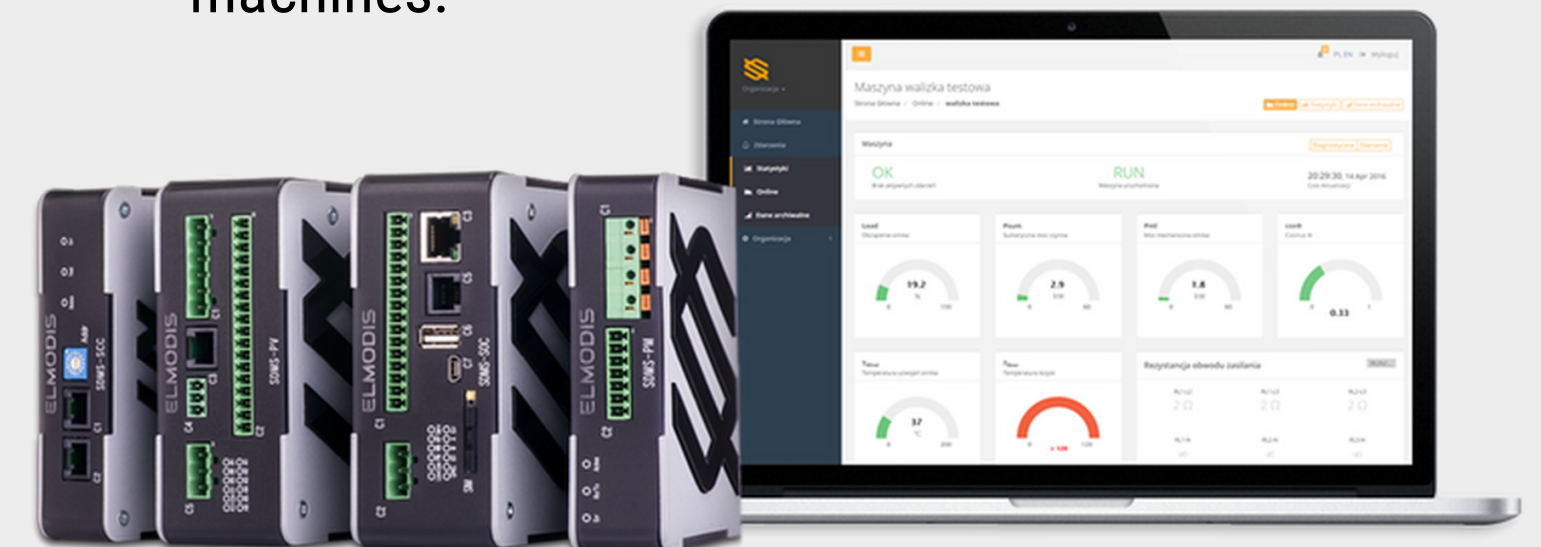

Improving operating and energy efficiency of industrial machines

ELMODIS

WE MAKE INDUSTRY SMARTER

We help manufacturing companies by giving them access to informations that enable them to:

✓ Reduce energy consumption

✓ Increase lifetime of assets

✓ Enhance productivity

✓ Decrease downtime & repair/service costs

✓ Improve inspection quality

Elmodis system is a solution providing comprehensive monitoring of industrial machines. With its optimum architecture not only is it scalable but also fully adaptable – possible to be implemented in any number and almost any type of electrically-driven machines.
