# Viva Insights

## Productivity en wellbeing

### Personalized and actionable insights

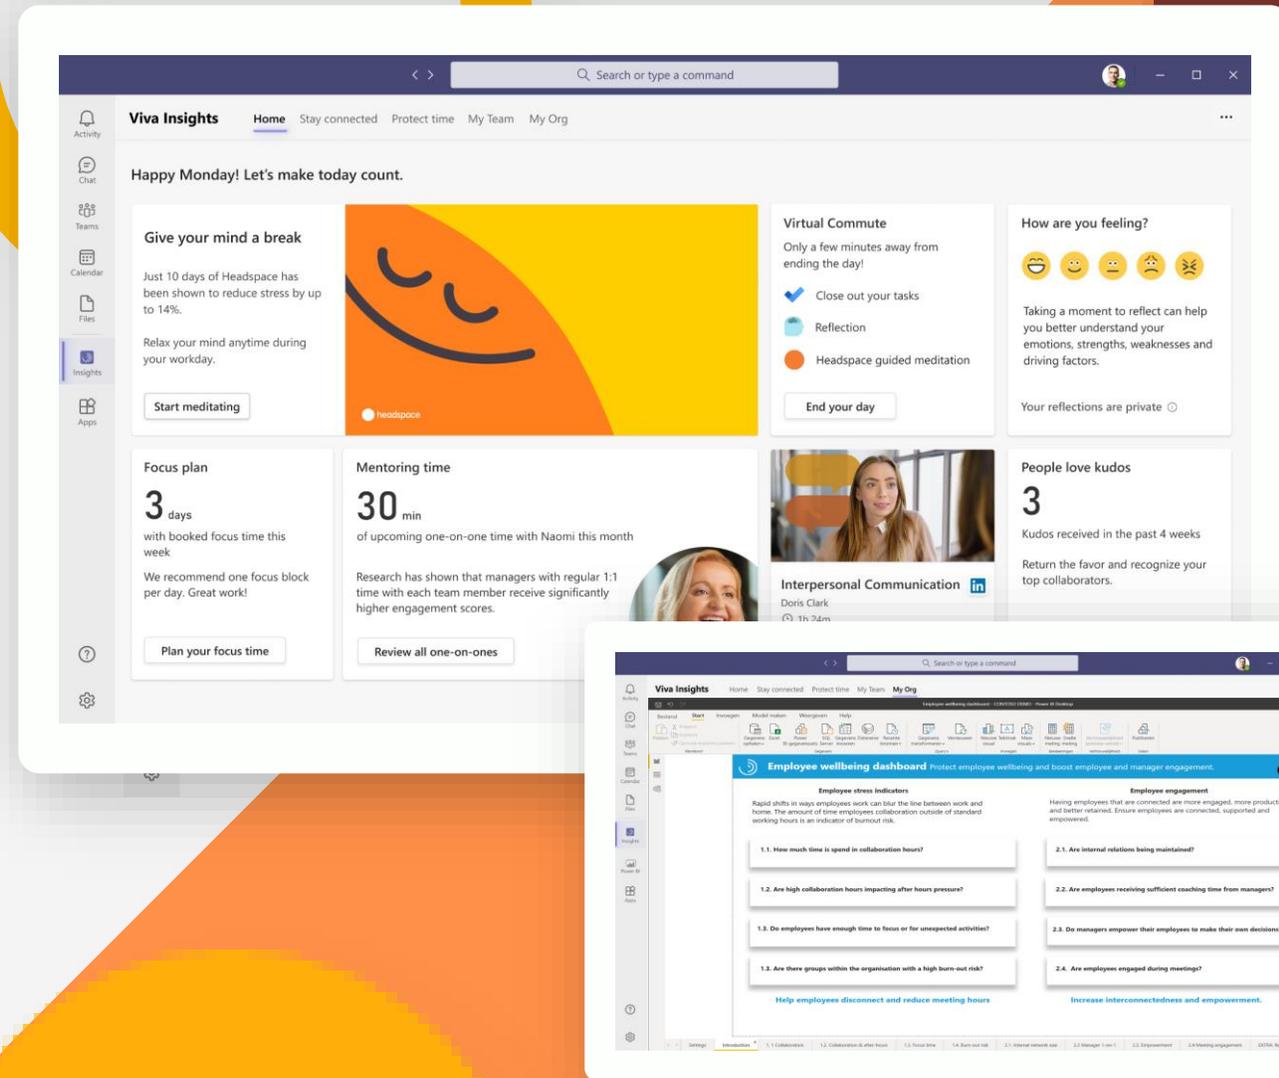

Empower individuals, teams and organizations to achieve better work patterns with personalized insights and recommended actions

### Measure the impact of work on people and organization

Get data-based, privacy-protected insights into how work patterns affect well-being, productivity and outcomes.

### Address complex challenges

Use advanced tools and additional sources of information to perform deeper analysis, address challenges that are important to your organization, and respond quickly to change.

# VIVA INSIGHT – Our services\*

## Quick start

Quickly understand the opportunities for your organization. Discover the organization's collaboration patterns. Receive analysis and actionable insights within three common productivity themes. Identify the biggest opportunities and get advice on how to address them.

## Insights enriched

Together we take stock of the goals and ambitions regarding the use of VIVA Insights and translate them into desired scenarios. We set up organization-specific dashboards and analyze the data. Then we develop a data-driven adoption plan based on your challenges

## Wellbeing deep dive

Help employees develop healthy work habits. Our Wellbeing dashboard gives you insight into the well-being of employees and managers. During the wellbeing deep dive we enable you to identify the biggest challenges and provide practical tools to for example reduce (meeting) stress and burn-out.

Required\*:  
Workplace Analytics / VIVA Insight licences

*Insight & approach*

**I want data-driven insights to improve the productivity and wellbeing.**

*Insight into effectiveness, productivity and wellbeing*

Microsoft Viva Insight uses data-driven insights and recommendations to improve the productivity and wellbeing of your organization and employees. Our quick insights solution provide an easy way to gain insight into productivity, employee wellbeing and manager effectiveness in your organization.

# VIVA INSIGHTS – Quick start

Guidance, analysis and advice

*Recognize patterns and make adjustments where needed*

Our quick start is a good place to start your journey with VIVA Insights. We help you navigate the platform; we analyze the results of the 'collaboration assessment' and give you tools to follow through on the insights that emerge.

*How it works.*

The Quick start is a simple and quick way to quickly gain insight within 3 themes: Smart Digital Meetings, Manager Effectiveness and Employee Engagement. The quick start takes approximately 4 to 6 weeks to complete and includes:

Guidance on implementation and communication

Understanding the data: analyzing collaboration patterns

Discuss the insights within the 3 main themes

Reporting on the biggest opportunities, and how to address them.

*The next step (optional)*

*VIVA Insight Enriched and/or Wellbeing deep dive*

## I want data-driven insights to address my organization's current challenges.

*Understanding organization-specific challenges*

Microsoft Viva Insights helps people and organizations grow with data-based insights and recommendations to improve productivity and well-being. During the Insight enriched program, we'll discover the capabilities of VIVA Insights together and get straight to work on your organization's challenges.

# VIVA INSIGHTS – Insights enriched

## Guidance, analysis and advice

*Discover opportunities to optimize business processes*

Together we identify the challenges within your organization. We uncover the current situation and look for opportunities within the organization. We jointly inventory the goals and ambitions regarding the deployment of VIVA Insights and translate these into desired scenarios. We set up organization-specific dashboards and analyze the data. We then develop a data-driven adoption plan based on your challenges.

*How does it work?*

The Insight enriched takes about 8-10 weeks to complete and includes:

We start the program with a stakeholder workshop. During the workshop, we work with stakeholders to identify the challenges and establish the desired outcome.

Guidance on implementation, communication and configuration

We analyse the data and develop an organization-specific dashboard of insights.

The adoption plan is based on your current situation, organizational context, opportunities for improvement and potential dangers on the horizon

We identify the biggest opportunities give guidance on how to address them and continue to measure progress.

## I want data-driven insights to improve the well-being of my employees.

*Understanding employee well-being and engagement*

Microsoft Viva Insights helps people and organizations grow with data-based insights and recommendations to improve well-being. During the wellbeing deep dive, we implement our unique wellbeing dashboard to drive engagement, well-being and work-life balance among managers and employees.

# VIVA INSIGHTS – Wellbeing deep dive

Guidance, analysis and advice

### *Protect and promote the well-being of your employees*

The rise of remote working has changed the way employees interact. How do you ensure that employees are engaged, motivated and balanced? With the wellbeing dashboard you gain insight into the work behavior of employees in order to identify (un)healthy work routines. We enable you to protect and promote the well-being of employees and managers.

### *How it works?*

We configure the wellbeing dashboard with your organizational data and analyze the data within two themes: Stress Indicators and Digital Connectedness. The Wellbeing deep dive takes approximately 5-7 weeks to complete and includes:

Guidance on implementation and communication

Insight into the data: Configure and analyze well-being dashboard

Discuss the insights within the 2 main themes

Reporting on the biggest opportunities, and how to address them.

# About 1uur.nu

We help employees work productively and smartly with Microsoft 365

## Practical

Just do it and do what you promise. We believe that simplicity always works best.

## Personal
