

# SAP SuccessFactors and Azure AD Integration

## Enable User Lifecycle Management by integrating SAP SuccessFactors and Azure Active Directory

Oxford Computer Group's experience working with SuccessFactors HCM extends back to 2012 and spans both current and previous versions of the product.

### WHY OXFORD COMPUTER GROUP?

- Experience delivering auditable processes for highly regulated industries
- Broad experience migrating provisioning capabilities from HCM to SuccessFactors
- We integrate SAP data models with external provisioning agents
- We manage the complex use cases

OCG has an 18-year track record of solving complex enterprise identity, governance, and security challenges. We assess architectures and processes, and make recommendations designed to support strategic objectives. To accelerate deployment, we use our proven methodology, best practices, and a unique library of code developed during 900+ projects.

### WHAT WE OFFER

Whether your organization is using SAP SuccessFactors HCM or SuccessFactors Employee Central, OCG can help you:

1. Provision SuccessFactors to Azure AD
2. Provision SuccessFactors to on-premises AD

After integrating Azure AD and SuccessFactors, we can also provision to other cloud-based applications.

This integration moves your organization closer to a Zero Trust environment using Microsoft Entra. In addition, you'll establish a foundation for SSPR, SSO, MFA, and passwordless authentication.

### INTEGRATION BENEFITS

- Improve security
- Configuration and management of provisioning in one place - the cloud
- Improve audit processes with streamlined reporting
- Helps your organization take full advantage of your Microsoft Entra investment
- Eliminate manual provisioning processes and simplify existing automated provisioning processes

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
