

# Azure Operation Pack

## Azure Continuous Improvement

With over 750 specialists, our skills and competencies are truly diverse. We can help on several fronts, such as IT outsourcing and cloud services. Every company is different, but IT Relation always starts with the same primary consideration: the business. What challenges do you face? What are your objectives, your ambitions? Once these have been delineated, we can talk about the best way to release the potential for growth in your business.

### Our offering

Companies today are confronted with a challenge of balancing security and IT resources with demands for remote work. Enabling secure and scalable access to corporate resources can help you keep business moving forward.

### Challenge

If you are like most, you probably experience IT costs not being stable as they used to be. You might experience some budget overruns or have a nagging feeling that you are overpaying for some of the new cloud services.

### Solution

Our solutions and business principles are built for positive financial and environmental impact with a simple overview. Our mission is to give you the solutions that make you control and save your investment in the cloud.

### Advantage

Every month you scramble to find reasons why your Azure bill grew way over your forecast, and you can't seem to find the right answers or solutions in time. Imagine you could make your Azure costs go to sleep. With our dashboard you get exactly that. A smart sleep timer for the resources that shouldn't run 24/7.
