

Bechtle Azure Virtual Desktop Package

11.5 days implementation

Agile working has become an important hurdle to jump in forwarding your corporate development. Azure Virtual Desktop can help you do this. The COVID-19 pandemic has highlighted the need of companies to empower workers with fast, flexible and simple remote working capabilities, without compromising compatibility, performance, security or simultaneous access to shared resources. Azure Virtual Desktop (AVD) can help you bring your company's IT infrastructure up to scratch-with state-of-the-art Windows 10 combined with the dynamic of the Microsoft Cloud, providing an unmatched, cost-efficient pricing model.

WHAT ARE WE OFFERING?

Our Bechtle Azure Virtual Desktop package will help your company to introduce Azure Virtual Desktop successfully, by providing the necessary organizational and technical framework. The package includes a series of workshops and building blocks that will provide a blueprint for the solution design.

How do we get there?

Our all-embracing approach includes the creation of an architecture and design, as well as the preparation and implementation of the AVD solution, complete with ongoing support as you migrate to your new solution.

When is the right time?

Let's say you are planning to free up your local infrastructure but are also thinking of providing a modern workplace or updating or replacing your current VDI solutions.

This is where Bechtle's AVD package can really round off your modern workplace concept.

What are your benefits?

- | Scalable provision of cloud-based Windows 10 desktops
- | Complete integration with the Microsoft 365 experience
- | Minimal administration required
- | Video and voice conferencing with Microsoft Teams
- | Cost-efficient solution that allows you to control costs transparently
