Yammer/Viva Engage Migration

Migrate Yammer data from Tenant-to-Tenant, Network-to-Network, Group-to-Group, and from other enterprise social networks (Salesforce Chatter, Workplace by Meta, SAP Jam, and Jive) to consolidate your Viva Engage experience!

Why WM Reply?

Based on years of experience implementing Yammer for customer, WM Reply has built an Azure based migration tool that WM Reply Specialists use to accelerate migration. We take customers through a Discovery phase to better understand their business needs and technical landscape to configured the migration tool to reflect your environment and minimize manual work.

Get started today with **Viva Engage**

- ERGs, Culture Communities: local and global connectivity
- Internal Comms: all company announcements, events, and campaigns
- Leaders: spotlight on personal stories, goals, videos
- SME Groups: knowledge sharing globally, local FAQ platform
- New Hires: platform for networking and acclimating
- Frontline workers: mobile-friendly experience
- Single, unified experience in Teams

Approach & Deliverables

Discovery
- Analysis of the Yammer network and M365 tenant to gather requirements of the migration
- Discovery surrounding the infrastructure and systems currently used and how the migration tool will interact with these
- Outline timelines and resource allocation for the migration in a comprehensive plan

Proof of Concept
- Scoping of sample communities
- Execution of migration tool for PoC communities in scope
- Verification of migrated content to ensure completeness

Migration
- Execution of the migration plan
- Using the active user list from the network export to activate Yammer profiles in the destination network
- Inspection of the migrated content to ensure its completeness

Included Migrated Content

Our migration tool supports the migration of almost all Yammer content, including posts, replies, likes, files, announcements ..., whilst mapping content to the relevant destination Yammer user (to maintain ownership).

Cost Structure

The volume of migrated data, the number of users, and the Migration tool license fee are the key drivers of the standard migration cost. Some indicative costs for a full project are below:

Small Production Migration
$34,600
(4 Weeks after onboarding)

Phase	Cost (USD)
Discovery & PoC	$19,600
Migration of under 50k items (posts, replies, files, hyperlinks)	Starting from $15,000

Medium Production Migration
$49,600
(6 Weeks after onboarding)

Phase	Cost (USD)
Discovery & PoC	$19,600
Migration of 100k items (posts, replies, files, hyperlinks)	Starting from $30,000

Large Production Migration
$69,600
(8 Weeks after onboarding)

Phase	Cost (USD)
Discovery & PoC	$19,600
Migration of over 250k items (posts, replies, files, hyperlinks)	Starting from $50,000
