LIFT & SHIFT MIGRATION
2-Wk DISCOVERY ASSESSMENT

Planning to migrate to Azure? Then you know this is a continuous process that not only involves technology, but also results in significant organizational changes that will affect your employees and business processes. Drawing on our extensive experience from many Azure migrations, ITI's holistic approach will ensure you migrate successfully.

The first step consists of discovering and assessing the environment you wish to migrate. With the data collected, you'll be able to build your business case for the budget and develop your migration plan.

Drawing on our years of experience doing these migrations, ITI will be able to recommend migration strategies to Azure, highlight potential issues running your workloads on the Microsoft platform and suggest native Azure services to make the best out of your project. You'll also be able to determine what should and should not be migrated, saving you time and money.

Why choose Lift & Shift Migration: Discovery?

→ Create a strong corporate memory
→ Obtain guidance from experienced migration experts
→ Optimize your costs, plan and time spent for the implementation

ITI's approach

For 30 years, ITI has combined the energy and innovation of a start-up with the experience of a firmly established company. With 450 employees who hold a total of 1,400 certifications, ITI provides high-level expertise to serve more than 2,000 clients.

ITI's Azure team is a leader in this practice, with thousands of hours of experience working on hundreds of architecture, implementation, migration and modernization projects. ITI's methodical approach is based on the Microsoft Cloud Adoption Framework for Azure, which enables organizations, both public and private, to plan and execute their migration at a sustainable pace and reap benefits from it in the early stages.

Our deliverables

→ Discovery of existing server environment
→ Documentation of existing assets
→ Recommendation of a migration strategy for the various workloads
