

# Insights Accelerator with FastBeat

**Bridging the gap between your data and the ability to transform into actionable insights.**

The digital transformation of your business requires a robust data architecture with strong governance. Organizations need capable infrastructure and expertise to be able to fully harness the power of data and enable insight-driven decision-making processes.

FastBeat is an end-to-end DataOps solution that brings the data maturity level of your organization to the next level. It encompasses Azure DevOps best practices and a set of validated data processes.

## Why FastBeat?

- Reduce the time window to have “insights ready” data.
- Eliminate boring repetitive activities through setting templates based data pipelines.
- Disrupt the silos where Data get trapped within your organization.
- Ensure consistent ways of addressing data security and privacy concerns.
- A Must-have framework for your Data Mesh journey.

## Approach

**Our consultants help assess and plan the enablement of the next data maturity level:**

- Determine the current state of your organization's data architecture, DevOps tooling.
- Prioritize use cases for implementation.
- Determine success factors, and plan for Azure adoption.

## Outcome

**FastBeat helps in industrializing your data capabilities with:**

- Deployment of reproducible processes.
- Embedding security practices into the data landscape.
- Enabling Insights Mining First approach.
