

LIFT & SHIFT MIGRATION

3-Wk IMPLEMENTATION

Migrating to the cloud doesn't have to be a daunting task. ITI's three-step Lift & Shift approach allows you to quickly transition your existing assets to Azure, opening the door to a world of possibilities.

Following the discovery and definition phase of your strategy (**Lift & Shift Migration: 2-Wk Discovery**), your existing Azure landing zone will allow you to migrate your workloads. To reduce migration risks, we opt for an iterative approach at every stage, with a series of tasks that must be successfully completed before moving on to the next step.

We've built our expertise by successfully completing hundreds of Azure migrations. Our approach is based on Microsoft's proven methodology to simplify and speed up your transition to Azure while removing most of the work from your hands to optimize your time. ITI provides assistance at every step, from planning operations to implementation.

Why choose Lift & Shift Migration: Implementation?

- Accelerate your migration to the cloud with a rehosting approach
- Reduce your risks
- Increase your return on investment

ITI's approach

For 30 years, ITI has combined the energy and innovation of a start-up with the experience of a firmly established company. With 450 employees who hold a total of 1,400 certifications, ITI provides high-level expertise to serve more than 2,000 clients.

ITI's Azure team is a leader in this practice, with thousands of hours of experience working on hundreds of architecture, implementation, migration and modernization projects. ITI's methodical approach is based on the Microsoft Cloud Adoption Framework for Azure, which enables organizations, both public and private, to plan and execute their migration at a sustainable pace and reap benefits from it in the early stages.

Our deliverables

- Enable replication of your systems to the cloud
- Test failover and make necessary adjustments
- Failover and go-live assistance

AVAILABLE PLAN

Service Code MIG-IMP-STD-002

DELIVERABLES	DESCRIPTION	INCLUSIONS
Preparation	Replication tool implementation	x
Replication	Replication policies, initial replication	x
Test failover	Test failover to Azure (offline mode), assess, adjust as necessary	x
Failover	Final failover of your resources	x
Go-live assistance	Includes up to 10 hours of support in total over the 5 days that follow the failover	x
Cleanup	Removal of unused Azure resources	x
Optional services	<ul style="list-style-type: none"> Decommissioning of resources in the source environment Fixing any existing issues Refactoring, rearchitecting, rebuilding or replacing existing workloads Changes or optimizations of the environments 	
FIXED IMPLEMENTATION FEE PER INSTANCE (physical or virtual server)		\$1,600.00

CLIENT REQUIREMENTS AND RESPONSIBILITIES

- Your participation during the project is necessary
- ITI must have administrator access to your source environment, and Azure tenant and subscriptions
- You must have a configured and functional Azure landing zone
- This offer is valid only if you complete the **“Lift & Shift Migration: 2-Wk Discovery”** step

IMPORTANT NOTES

- Pricing excludes all Azure consumption
