POWER PLATFORM HACKATHON: 3 WEEKS WORKSHOP

A hackathon is a fun way to engage lots of people within your organization around a digital culture of change. The key objective is to develop sample apps and cultivate ideas to drive digital transformation. Teams come together at the line of business or at the global scale, from different roles and departments to compete and create apps that address an organizational need.

As a result of this 3 weeks Hackathon, we will design and configure the first Power Apps solution together with you. During the Hackathon we will teach a group of your professionals about Power Platform technologies. After the Hackathon they can apply all knowledge to support and develop existing Application and generate new Power Platform ideas across organization. This training will take your team through a deep dive into any Power Platform component.

Agenda:

Week 1:

- Power Automate Basics Training in small groups (cloud flows + desktop flows).
- Prototype ideas generation session.

Week 2:

- Power Automate Basics Training in small groups (Canvas Apps, based on Excel and SharePoint), Power Apps in Teams.
- Prototype ideas generation session.

Week 3:

- Power Apps Virtual Agents in Teams Training in small groups, Power Platform for Admins training.
- 1-day Hackathon (teams of 2-4 people solve real business scenarios in one day).

Deliverables:

- Trained IT/business professionals.
- 1 pilot Application.
- List of generated apps ideas for future development.

30+
Happy customers

50+
Workshops and assessments conducted

50+
