CloudOnMove

Revolutionize your cloud journey

Unlock the potential of cloud: Manage your multi-cloud environment, migrate to cloud and secure your data for disaster recovery. Easy, fast and cost-effective with CloudOnMove.

CloudOnMove is a SaaS tool to manage your entire cloud environment including private, public, and hybrid cloud. It allows you to easily migrate to the cloud or between cloud service providers and provides a cost-effective way for disaster recovery.

Why customers use CloudOnMove

- To easily manage multi-cloud
- To migrate faster to cloud
- To save in costs

Easy

- **Easy to use**
- No software installation
- Web-based tool

Simple setup

Fast

- **One tool for all needs**
- Automated live migration
- No disruption in operations

Migration time only 1 hour compared to 1 day with manual work

Cost-effective

- **Reduced manual work**
- Scalability according to use
- Avoid vendor lock-in

Savings up to 50 % per machine

20% of support requests take 80% our IT support's time. By automating these 20%, CloudOnMove creates remarkable time-savings, and that way also cost-savings.
