

We established our Data & AI practice in 2014. As an Azure Expert Microsoft Service Provider (MSP) we use a full stack approach, with expertise in every facet of cloud transformation. Work with our team of solutions specialists, architects and data scientists to understand and unlock the business value of data.

Collaborate with Crayon data scientists that specialize in Data & AI solutions. Together we will analyze use case scenarios to identify challenges your business faces, and how a data platform integration can address them. Within seven business days you will have recommendations and an action plan with next steps for implementation.

Source Gartner

By 2024, data fabric deployments will quadruple efficiency in data utilization while cutting human-driven data management tasks in half.

Source Gartner

By 2023, more than a third of large organizations will have analysts practicing decision intelligence, including decision modeling.

Workshop Overview

- 1 **Improve** your understanding of possibilities of data and AI.
- 2 **Ideation** about the possibilities for data and analytics development identifying opportunities and challenges in your organization with quick time to value.
- 3 **Begin exploring** your data to identify the best solutions
- 4 **Identify** use cases potential solutions by exploring business use cases from within your industry.
- 5 **Prioritize** a list of use case scenarios for your organization.
