

Intelligent Collaboration - Teams Calling

Atos

Intelligent Collaboration – Teams Calling to Enhance Team Performance

The Atos logo is displayed in a blue, stylized font within a white rectangular box with a thin blue border.

Challenges

Migration from legacy voice and video systems, key to Intelligent Digital Workplaces, is difficult due to external federation and interworking, while user adoption can be slow as adapting to new ways of working can be confusing.

The technical diligence required for this necessary change can be daunting for customers due to the configuration of experience analytics reporting, security and compliance and productivity automations. New features and updates can also cause unexpected impacts.

Ideal Solution

Atos offer a smooth transition to Intelligent Collaboration through capabilities for secured and compliant voice/video, content and task productivity applications with profile selection, readiness, configuration, analytics, management and support.

Flexible designs are assured by capabilities in building on public cloud, customized dedicated or hybrid build, ensuring service levels up to 99.9% cloud and 99.999% when hosted, as well as a line of business app integrations.

Desired Outcomes

Avoidance of communication silos, boosted internal collaboration, enhanced employee and customer experience. From assessment to design, deployment and operations, users will be supported to adopt and be productive during the transformation.

Reduced user downtime as information accessible from any device, anywhere - softening the impact of a crashed devices. Secure and compliant communication through the implementation of state-of-the-art cyber security and compliance standards.

Intelligent Collaboration – Teams Calling

Intelligent Collaboration – Teams Calling unlocks enhanced team productivity and truly collaborative working environments

Supporting millions of users

- Currently supporting 40M PBX users in traditional communications, 1.2M users on Skype and >600k users on MS Teams.
