Microsoft Viva: Employee experience platform

Microsoft Viva is an Employee Experience Platform (EXP) designed for the digital age. Viva brings together communications, knowledge, learnings, resources, and perspectives into an integrated employee experience that enables individuals and teams to do their best from anywhere.

Powered by the extensive functionality of Microsoft 365, it is available through Microsoft Teams and other Microsoft 365 applications that people use every day.

CONNECTIONS

To keep the connection and the improvement of the digital workspace.

INSIGHTS

Balances the wellbeing with the productivity.

TOPICS

Connect knowledge with experts.

LEARNING

Bring together learning Skills.

Viva Connections

The image displays the Relecloud Viva Connections interface, which is a hub for internal communication and collaboration. The main dashboard features a navigation bar at the top with options like HOME, WHO WE ARE, WHAT'S HAPPENING, FIND IT, NEWS, and MY SHAREPOINT. Below this, there's a search bar and a user profile icon. The central area is dominated by a large banner with the Relecloud logo and several featured articles. One article highlights a new product innovation developed in partnership with the disability community. Another article introduces the team behind the design, emphasizing partnerships and inclusive ideas. Other articles focus on building a sustainable world together and wellbeing through Outlook. Below the main banner, there's a 'Feed Highlights' section with four featured posts: a news room announcement about a five-year commitment to bridge the disability divide, a learning video on managing employee concerns, a Wired article on virtual relays, and an all-company post about the design team. To the right, a mobile app overlay shows the Relecloud mobile interface, including a dashboard with announcements, health checks, dining information, and insights. The mobile app also features a search bar and navigation tabs for Dashboard, Feed, and Resources.
