CrossCipher MDR Service powered by Microsoft Sentinel to resolve today's biggest Cybersecurity monitoring and response challenges

As businesses continue to leverage digitalization to open themselves up for new business opportunities and cybersecurity threats are aggressively evolving, enterprise across all sectors face an evolving cyber threat landscape. It is imperative that traditional SOCs keep pace by priority threats and leveraging the detection and response capabilities available to them

Challenges that these trends bring are:

o **Malicious attacks are being missed by existing tools**
o **Organisations struggle to source cyber security talents for their business**
o **Organisations use more disparate technologies for security analytics and operation**

Microsoft Sentinel is one of the next generation security information and event management (SIEM) and security orchestration automated response (SOAR) solution that helps to mitigate these risks by collecting data from all your devices and applications so you can quickly spot suspicious behavior and eliminate any threats. **But to realise this, you need the right people with the time and the process to run it and the expertise to understand what the alerts mean and how to build on intelligence and insights you gain.**

CrossCipher Managed Detection and Response (MDR) is an advanced managed security service that provides threat intelligence, threat hunting, security monitoring, incident analysis, and incident response.

We identify and provide visibility into your critical assets spread across different environments – On-Prem, Cloud, SaaS,

We help you stay compliant with your regulatory and costumer requirements

We remove the burden of managing complex security technologies

We strive to bring down the Mean-time-to-Detect (MTTD) & Mean-time-to-Respond (MTTR) to minutes, which is crucial for organizations become resilient against advance cyberattacks

Delivered through our Advanced Security Operations Center (ASOC), CrossCipher MDR service leverages best of breed cloud-native Microsoft Sentinel solution, providing intelligent security analytics at cloud scale for entire enterprise.

Please visit to us. hello@crosscipher.com

Tap into our technical Expertise & get proactive support on hand

CrossCipher SOC will monitor your Microsoft Sentinel workspace around the clock giving you the information you need to respond proactively with automated incident response and full incident lifecycle management with escalation & third-party management.

Threat Intelligence & Threat Hunting Services

CrossCipher SOC uses different data sets and threat intelligence feeds to prepare against the latest attack vectors. We identify & mitigate threats as they emerge and ensure your business and wider ecosystem are always prepared for effective response.

Cost Effective approach for mitigating Cyber Threats

CrossCipher service is designed as a cost-effective cybersecurity solution backed by world class support and expertise that helps in increasing your security posture and assist with rapid response to minimize actual loss or disruption to your business.

Our Approach

We have created an effective approach to fulfill the security challenges of each of our clients with below approach.

Understanding Phase → Design & Architecture → Implement & Tuning → Automating Response → MDR Services

OUR SERVICES

CROSSCIPHER OFFICES

o **Consulting & Implementation Service**

We offer consulting and deployment services delivered by experts across Microsoft Sentinel & other security solutions.

o **Managed Detection & Response**

Through our Managed Microsoft Sentinel Service, the Organisations can benefit from rapid deployment, streamlining security operations and access to technical expertise managing 24x7 security monitoring.

o **Outsourcing Specialized Expertise**

We can support you with providing individual experts necessary to support your company and your specific needs in Microsoft Security solutions.
