

CloudCare is a complete management tool that connects different IT-environments into one easy to use website.

By means of very simple actions in CloudCare, complex processes within Office 365 and the local active directory can be automated and simplified. Through one interface you can gain visibility into all user settings and easily manage user permissions.

Easy to use!

Wizards

Helps the IT-responsible to automate processes that require multiple actions in several environments.

Reports

CloudCare brings data from different systems together and generates several valuable reports.

HR

Give the HR-department limited access to manage the users in the IT-environment without risks or knowledge.

Working hours

The employees can only send or receive emails on any device within the selected time frame.
