# Scale Planning

Remote Flight Planning
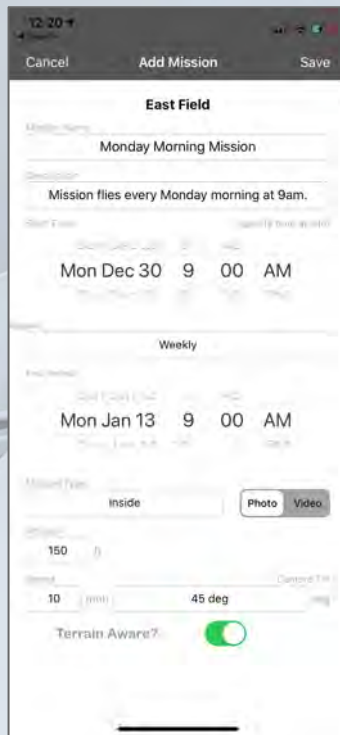

Mission Scheduler

Live Video and Flight Path View

Plan thousands of flights remotely

Simple Operations

Preflight checklist

One-touch flight

Automated hands-free flight

Operate autonomously checking for compliance and safety
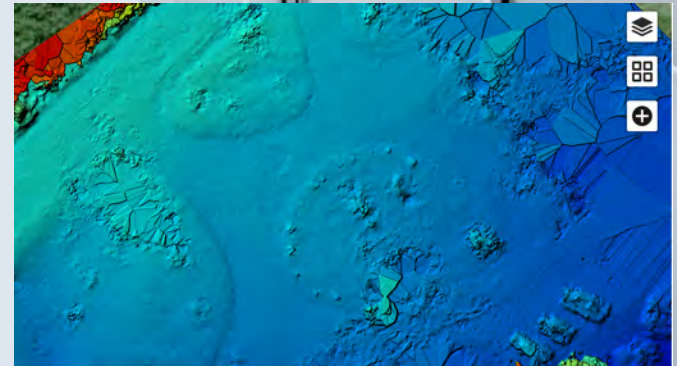

Swift Analysis

Volume, Area and Distance Measurements using 3D model

Plant Health using NDVI index

Site Inspection using Orthomosaic maps

Topography using Digital Surface Models

Analyze data using AI-powered analytics engine

Seamless Collaboration

Realtime Flight and Maintenance logs

Annotate images and Drive task workflows

Collaborate across global stakeholders using annotation and task workflows
