

Enkay PRO Monitoring Capabilities

1. Fast search based on tracking values inside messages.
2. Ability to download files and messages from portal.
3. Can check field values to verify accuracy.
4. Receive email alerts when exceptions occur with link to portal for further investigation.
5. Resubmit files when failures occur, including bulk resubmission of failed messages.
6. View status (e.g., success or failure) of integrations.
7. Get statistics (e.g., hourly, daily, weekly message counts).
8. Identify performance issues quickly and detect anomalies in traffic patterns.
9. View health of applications, infrastructure, and databases.
10. Developers can offer this portal to their integration customers as a monthly subscription.
