# CONCURRENCY APPLICATION MODERNIZATION ASSESSMENT

Modern apps transform customer engagement with cross-device experiences, open and hybrid cloud capabilities, and data-driven intelligence

Concurrency's Application Modernization Assessment works with you and your organization to improve your overall engagement with customers and your employees through application development.

Applications fuel digital transformation.

Engage your customers.

Transform your products.

Modern apps

Enable your employees.

Optimize your operations.

✓ Rapidly create and deploy web, mobile, and API apps that scale with your business, on any platform.

✓ Free developers from management of infrastructure.

✓ Scale vertically and horizontally without downtime with an integrated load balancer and in-memory caching--these things are baked into the platform.

✓ Multiple deployment slots for easy blue-green testing. A/B testing, and simple rollbacks. Ultimately, you have much more control over how you do your staging.

✓ Automate and simplify Azure deployments via integrated CI/CD capabilities with GitHub, Azure DevOps and more.

✓ Meet rigorous performance, scalability, security and compliance requirements using a single back end.

Concurrency

Capabilities Concurrency Explores with You and Your Team Include:

Ideation

Ideation is the creative process of generating, developing, and communicating new ideas, where an idea is understood as a basic element of thought that can be either visual, concrete, or abstract. Ideation comprises all stages of a thought cycle, from innovation, to development, to actualization.

DevSecOps

DevSecOps stands for development, security, and operations. It's an approach to culture, automation, and platform design that integrates security as a shared responsibility throughout the entire IT lifecycle.

DevOps - CI/CD

Continuous integration/continuous delivery, known as CI/CD, is a set of processes that help software development teams deliver code changes more frequently and reliably. CI/CD is part of DevOps, which helps shorten the software development lifecycle.

Center of Excellence (CoE)

A Center of Excellence (CoE) is a team of skilled knowledge workers whose mission is to provide the organization with best practices for an area of interest.

Governance/Policy

Concurrency will walk you and your team through the Cloud Adoption Framework governance model. Each area relates to different types of risks the company must address as it adopts cloud services. Within this framework, the governance guide identifies required actions for the cloud governance team.

Cloud Native App Dev

Cloud-native architecture and technologies are an approach to designing, constructing, and operating workloads that are built in the cloud and take full advantage of the cloud computing mode.

Low Code/No Code App Dev using Power Platform/Power Apps

If you opt for a low-code development platform, you can build the apps that your business needs in next to no time. With Microsoft Power Apps, you'll empower your teams to easily and rapidly build low-code apps that modernize processes, solve tough business challenges, and make your company more agile.
