

# Cloud Analytics Architectures Introduction: 4 hrs Workshop

This workshop will introduce you to modern cloud-based analytics architectures. Together we look at suitable storage methods and a modern data warehouse architecture.

Whether you are thinking about implementing a cloud-based analytics architecture in your company, or you already run a data-driven business and are looking for further information on modern technologies, in our 4-hour workshop we will give you an introduction to modern cloud-based Analytics architectures. We also look at suitable storage methods, a modern data warehouse architecture and analysis & visualization methods.

This half-day workshop is the perfect introduction for you to get to know the possibilities of Azure Synapse Analytics and is aimed at decision-makers, architects and business users who want to set up or update a modern reporting infrastructure. You will receive technical background information and training on using Azure Synapse Analytics.

Agenda: (The below agenda can be amended and customized according to your specific needs)
