

ActionPoint

Complete Cloud Migration

Enabling your organisation to become more agile,
scalable and secure by migrating to the Azure Cloud.

Your Cloud Journey Powered and Managed by ActionPoint

ActionPoint 

For a Process that sets you up for success,
Start your journey with a gold-certified and trusted partner:

- 1. Plan** - Develop a cloud adoption plan. As part of this planning stage we create an inventory of your digital estate, we address all skills and knowledge gaps and establish a framework for initial organisational alignment.
- 2. Migrate** - We work with you from the very first workload migration ensuring a seamless transition from on-premise to managed cloud.
- 3. Govern and Manage** - We manage and optimise your new cloud data centre, meeting with you to agree business commitments and operational baselines. We work closely with you to ensure continued stability of your investment and give you a platform to innovate into the future.

Schedule Your First Workshop Today

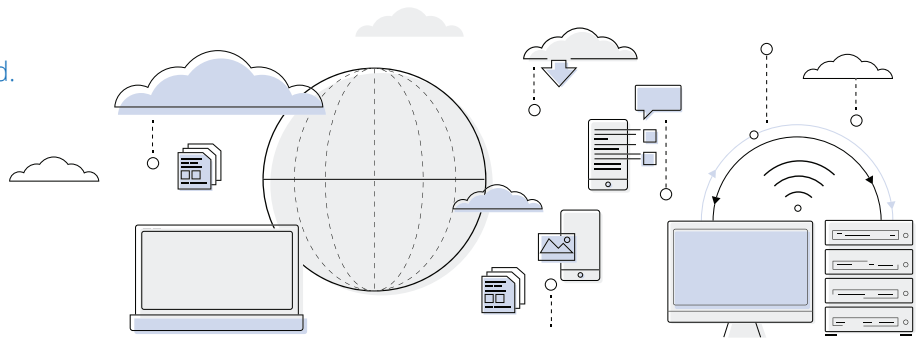

An expertly executed cloud migration strategy will have a significant impact on your organisation's scalability, agility and future innovation prospects. Take the first step towards securing your organisation's future today.

Contact your Account Manager to set up
a workshop or visits us at

Agile, scalable and secure Azure Cloud.

Key Motivations for Choosing 'Complete Cloud Migration'

Business transformations that are supported by cloud adoption can be driven by various motivations. At ActionPoint, we work with you to build motivation-driven strategies for undertaking cloud migration. This ensures that business value is core to your cloud migration journey.

Responding to Critical Business Events

Critical events include mergers, acquisitions or divestitures. The need for migrating your data centre can also be due to a reduction in capital expenditure or responding to a growing need to improve IT stability and reduce disruptions.

Migration of Data to a More Agile Environment

Data Centre Migration can be motivated by a need to create a more elastic IT environment. Organisations may need to significantly improve scaling capacities, prepare for new technical capabilities or optimise internal operations.

Create a Better Ecosystem for Continued Innovation

Organisations transition to cloud-based systems to better position themselves for future innovation. Cloud-based data centres are more equipped for disrupting the market with products or services, transforming legacy applications and improving customer experience.

The Importance of 'Complete Cloud Migration' for Modern Businesses

Operational Agility

Transitioning from physical data centres to a more elastic cloud solution, allows for greater scalability and flexibility.

A More Mobile Solution

Access to the Azure Cloud lends itself to increased workplace flexibility and a more mobile workforce. It also better positions organisations to operate internationally.

Greater security and compliance

Azure is used and trusted by 95% of Fortune 500 companies and is continuously monitored by Azure Security Centre.

ActionPoint is ISO 27001 certified meaning we meet the highest global standard for information security and management.

Why ActionPoint?

ActionPoint are a Gold Microsoft Partner with Gold level competencies and expertise across both on premise and cloud platforms. Our deep experience with Networking, Data Centers and Enterprise Application Development enables our client to not only engage and migrate to the cloud but also to innovate once they get there.

Winning Microsoft Ireland partner awards in both 2017 and 2018 combined with our Tech Excellence IT architect Team of the Year is testament to the client solutions we deliver. This combined with a team of Azure certified Consultants and Engineers including and a Microsoft MVP (Most Valuable Professional) for Azure means you're with the best partner for your Azure journey.
