vE – HCM+

How can vE Enterprise Solution help?

Alignment to Business Goals, Employee & Customer P&L & KPIs

We help our clients to ensure their existing applications work towards meeting business KPIs through integrations between applications, modifications to existing processes, training and understanding of business performance through real-time dashboards and reports.

Harness Data Analytics & A.I.

Building data analytics and artificial intelligence capabilities through platforms of SAP Leonardo, Microsoft, others as well our own platforms, in existing applications with our client partners.

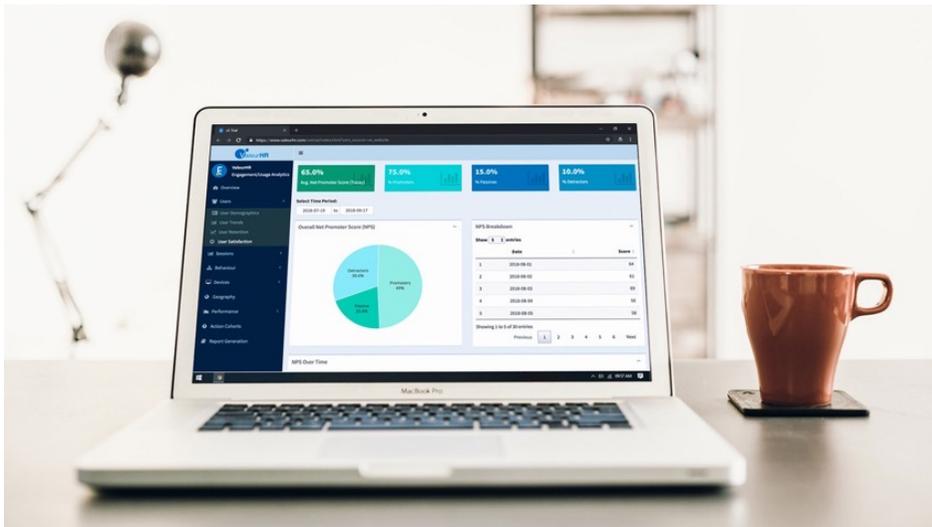

Identify Gaps in Existing Solutions & Technologies

vE helps to fill in any existing gaps (if any) for our clients to ensure that they stay updated of their business performance in real-time.

Digital Transformation to the Cloud

With our strong expertise on enterprise cloud solutions, we help our clients move their on premise solutions to cloud, scale up their existing cloud solutions with very high secured environments.

How It Works

1. Real-time Dashboards

Through machine learning and artificial intelligence, our real-time dashboards provide you with the insights you need for effective decision making.

2. Understanding Client's Specific Needs

Careful understanding of your unique needs and challenges, working together to develop sound solutions for the long-run.

3. Customised Solutions

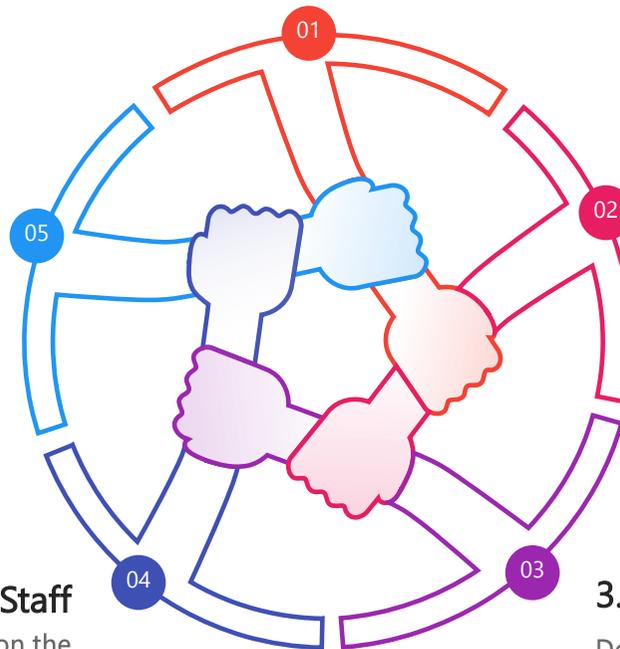

Depending on the business requirements, we develop customised extensions and plugins to the existing software applications, rather than replacing entire applications.

4. Empowering Staff

Empower the members by training on the use of existing systems and drive the desired outcome from the applications.

5. Intelligent Triggers

Our solutions deployed are in built with intelligent events and triggers that drive users to take prompt actions. All these are configurable and customizable to specific client's needs.

Why vE Enterprise Solution?

Achieve your business goals and streamline business processes.

Cloud-Based SaaS

Zero Footprint, Cloud based,
Pay as you Go platform.

Comprehensive

Extensive features and
functionalities.

Affordable

Very cost effective, low cost for
implementation, change
requests.

Secure, Robust & Scalable

Built on SAP HANA platform
that's safe, secure and scalable.

Cutting-edge Technology

Many times faster to
implement, easy to use, quick
retrieval of data.

Increase ROIs

With better understanding of your
business performance, make better
decisions and generate higher
return on investments.

Automate

Improve and strengthens the
existing processes, and automate
them to bring sustainability in
operations.

Reduce Cost

Improve key metrics of the
organisations, from cost of
production/development, to cost of
sales, to cost per customer acquisition
all within a single application.
