

# Application Modernization Assessment

Legacy applications struggle to keep pace with today's evolving technology landscape and rapidly changing customer needs. Running your applications in Microsoft Azure provides the ability to meet these ever-changing demands, at scale while ensuring each application is optimized for performance and cost.

The Application Modernization Assessment (AMA) is the first step in planning your modernization journey, designed to guide organizations through a detailed technical and financial plan of moving to Azure.

## Key Benefits of Application Modernization Assessment

Break down and analyze your current application portfolio with a dynamic dashboard, to easily identify migration and modernization candidates.

Detailed Azure consumption estimates with ability to drill down on cost by application, workload, database or virtual machine. Optional ability to add on 5 year financial business case and TCO to streamline the budgetary planning process.

Cloud roadmap and adoption plan that includes rationalization, prioritization and migration timelines to guide planning and help make decisions with confidence.

High-level future state Azure architecture that incorporates cloud strategy, data strategy, security, governance, and innovation.

## Assessment Deliverables

3Cloud's Azure experts will guide your team through data collection, design workshops and financial planning to create a customized roadmap on how to migrate and modernize your applications into Azure.

- ✓ Application Rationalization
- ✓ Azure Consumption Estimate
- ✓ High-Level Azure Architecture Recommendations
- ✓ Cloud Roadmap & Migration Schedule
- ✓ 360 Interactive Dashboard
- ✓ Optional Add On: 5 Year Financial Business Case & TCO Analysis

*Application Modernization Assessment is supported by Microsoft programs.*

# Migrate and Modernize Your Applications

As digital disruption leads to greater demands on IT systems and organizations, many companies are upgrading technologies to provide modern services to their end customers. In order to fully unlock the benefits of Azure, organizations need to take a strategic approach to their journey. 3Cloud is uniquely equipped to help clients develop and execute that strategy. Our award winning expertise in Data & Analytics, Application Modernization, and Infrastructure position us as the most comprehensive Microsoft Azure partner in the world.

“3Cloud has been a key partner to the Solution Assessment team since inception. They have continuously demonstrated how to lead customers to successful cloud outcomes via our portfolio of engagements and drive shorter time to value for our shared customers.”

- Chris Danelz, GM Microsoft US Solution Assessment Team
