

Other Solutions

Live Video Streaming Solution for Businesses and Customers (B2B & B2C)

PROPERTY & CASUALTY

LIFE & ANNUITIES

ACCIDENT & HEALTH

Live Streaming solution is a powerful medium of web and mobile app for real time video streaming, to help insurance companies augment vital on-field business functions like inspections, claims processing, agent training etc. The multi-purpose pluggable ready-to-use solution provides timely evidence and gathers vital data during live streaming, enabling insurance companies to combat fraud at source.

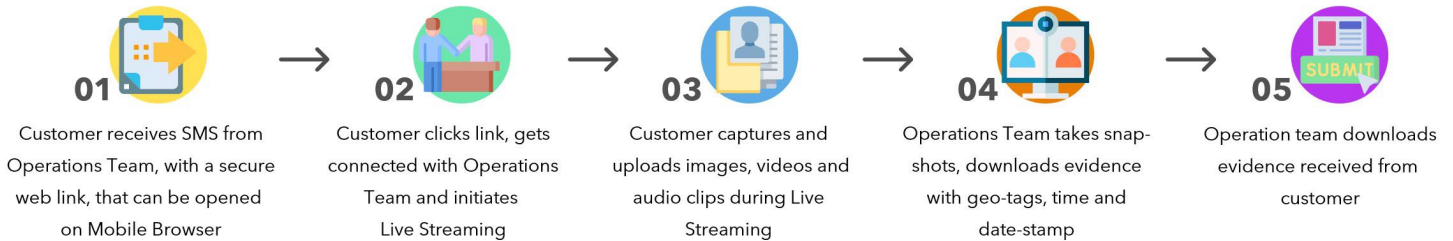

Live streaming platform offers an exclusive Mobile Browser to Web

Browser Solution for Customers (B2C) and Mobile App to Web Browser Solution for On-field Staff (B2B).

The B2C solution is exclusively crafted to enhance customer convenience and eliminates the need for them to download a dedicated mobile app for live streaming. Instead, they can communicate with the insurance company through a simple web browser link from the convenience of their mobile.

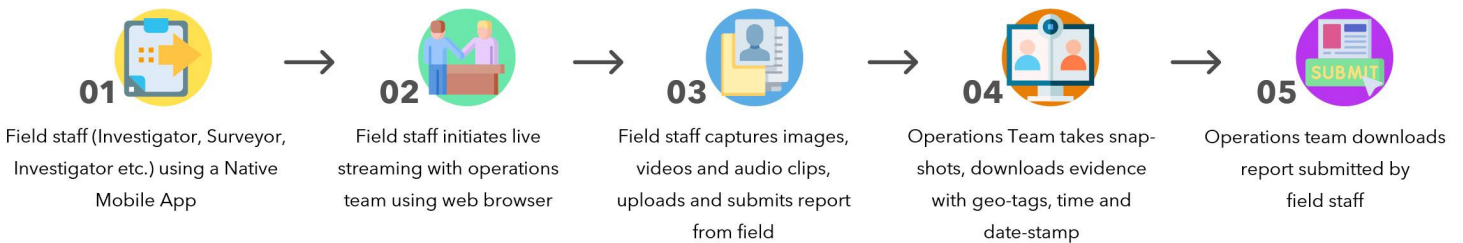

BUSINESS-TO-CONSUMER (B2C) SOLUTION

Mobile Browser to Web Browser

BUSINESS-TO-BUSINESS (B2B) SOLUTION

Mobile App to Web Browser

SALIENT FEATURES

VALUE PROPOSITION

- Reduce Inspection/Survey TAT**
Act on real time information from the field for quick decision making and quick turnaround times
- Reduce Operational Costs**
Assign 'runner boys' rather than surveyors to undertake on-field activities, enabling surveyors to focus on core tasks
- Maintain Data Confidentiality**
Ensure security and complete control of live streaming data
- Enhance Customer Satisfaction**
Convenience for customers to quickly initiate interaction with operations team, without the need of a dedicated mobile app
