PROCESS AUTOMATION | WORKFLOW | DIGITAL SIGNATURES | DIGITAL KYC

SECURE, ONLINE DIGITAL SIGNATURES WITH AUDITABLE WORKFLOW PROCESSES.

SIGNIFLOW is a core workflow and cryptographic digital signature engine that works, either on its own, or fully integrated with existing core business systems. SigniFlow utilises the most advanced & trusted digital signature technologies known to man, delivering powerful workflow functionality and ease of document distribution to automate any business process.

DOCFLOW is a powerful business process automation tool, based on configurable process- and workflow-rules with user-roles that allow documents to flow through automated and controlled approval processes. DocFlow enables complete automation and digitisation of document delivery and document archiving processes.

KYCFACORY provides businesses with software that automates and fully digitises the on-boarding of commercial businesses and consumers, in a manner that supports stringent Anti-money laundering (AML), Know-your-customer (KYC) and Risk Management and Compliance Programmes (RMCP) at accountable institutions, under prescribed legislation.
